Dear Bill,

RE: Butaperazine Syrup Study

There are two patients who are receiving butaperazine syrup and who should continue this form of treatment since they have done well and Dr. Clare would prefer maintaining the medication to allow maintenance of the present state.

Summaries of the two cases are attached.

An investigation of our supplies of 12/27 indicates that we have 9 pints placebo and 70 pints butaperazine available.

Would you please file an amendment to the study protocol to allow us to continue these two patients for a maximum of one year. As soon as we have found other ways of treating them we will return the remaining supplies of butaperazine.

Thank you for your cooperation.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
