Dr. Joseph G. Bird
Director, Division of Clinical Research
Sterling-Winthrop Research Institute
Rensselaer, New York

Dear Joe,

Enclosed is a proposed protocol for the study of cyclazocine in depressive disorders. I would be grateful for your comments before the proposal is officially submitted and approved. As we are beginning a new rotation of residents in the Mental Hygiene Clinic, this is an opportune time to initiate this proposal.

I will be away until Monday, so will call you early next week.

Many thanks.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
