Dr. T. Harris
EEG Laboratories
Mayo Clinic
Rochester, Minnesota

Dear Dr. Harris:

My associate, Mr. Shapiro and I recall our discussions in Sante Fe regarding your pattern recognition models with a great deal of interest. We have continued to explore the more simple frequency analytic model, emphasizing rather heavily the period analytic program.

How have your studies progressed? Would there be any mutual benefit in getting together within the next few months? If so, we would be pleased to invite you to visit St. Louis to provide for an opportunity to discuss your work. If this is feasible, our present schedules are quite heavy until mid-May, but thereafter we seem to have the luxury of a few months of an open schedule.

I look forward to hearing from you.

Sincerely yours,

Max Fink, M. D.
Professor of Psychiatry
