

73I-605

April 2nd, 1973

James McGaugh, Ph.D.,
Professor of Psychobiology,
University of California,
Irvine, California.

Dear Jim,

Thank you very much for your summary.

Except for reviewing some of the edited manuscripts and a general overview of the proofs, your contribution to the volume is now complete.

There are two or three small loose ends, but our work from the conference is about done, except for checking the proofs for the volume. I am most grateful for the opportunity of having worked with you, for your enthusiasm and good spirit throughout this endeavor.

My best personal regards.

Sincerely yours,

Max Fink, M.D.
Executive Director
