Dr. Allen P. Berger
Chas. Pfizer & Co., Inc.
Groton, Connecticut

Dear Allen,

Enclosed is a revised protocol of the EEG - thiothixene concentrate and capsule study. You may recall that in the first definitive study we misjudged the time of onset as well as the dosage.

Based on this experience, we have revised the study which now is in progress and is approximately one-quarter completed.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
