Dr. Richard P. White  
Department of Pharmacology  
University of Tennessee  
Memphis 3, Tennessee

Dear Dick,

Dr. Bradley and I are pleased to confirm the invitation for your participation in the symposium on Anticholinergic Hallucinogens at the forthcoming meeting of the CINP, to be held in Washington, D.C. on March 29 and 31. We look forward to the presentation entitled "Neuropharmacological Comparison of Subcortical Actions of Anti-cholinergic Compounds." As there are still a few questions about the ability of some of the European invitees to attend the meeting, it will be a few weeks before we can send a definitive program, and time schedule.

Five reports will be presented during each three hour session, allowing thirty-five minutes for each presentation and discussion. Since the discussion may be of special interest to the participants, the report should be about 20 minutes in length.

The CINP has permitted us to consider the publication of this symposium separately. Insofar as this subject is becoming increasingly important, we believe that the association of the work of the participants in a single volume will be a valuable contribution, and ask your cooperation in making a manuscript available at the time of the meeting. The manuscript should be approximately 20 pages of text, plus bibliography and illustrations.

I look forward to seeing you in March.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
