MEMORANDUM

To: Stanley F. Yolles, M.D.
From: Max Fink, M.D.
Subject: John Hanley, M.D.

I know of the work of Dr. Hanley. The curriculum vitae reflects an extensive technical background, with a heavy emphasis on the computational and electronic aspects of brain wave recording and analysis.

It would be appropriate to consider him for appointment in the Department. This is particularly true when one looks at Dr. Hanley's recent interests, especially the courses that he has recently taught. He seems to be moving in a direction of more general applications of his abilities.

I would recommend that he visit us, perhaps present a seminar, as soon as you deem it appropriate.
