

F. Kutter

December 9, 1965

Dr. David Prince
Division of Neurology
Stanford University
Palo Alto, California

Dear Dave:

I was pleased to have an opportunity to discuss double simultaneous stimulation with a fellow student. I am enclosing copies of the reprints which you requested, and have sent a similar set to Dr. Donchin. I am in the process of summarizing the present data that we have and will send you a copy within a few weeks.

I do hope you undertake tactile studies and that Dr. Donchin does an excellent a job with this as he did with visual masking.

Good luck in your studies.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
