

October 20, 1970

Mr. Robert L. Marlin
Sandoz Pharmaceuticals
Hanover, New Jersey 07936

Dear Bob,

In response to your letter of 10/15/70:

Our experience with S 42,548 are summarized in our report. We anticipate an opportunity to review this study, particularly since the study did not elicit a conventionally useful profile.

The study was done in male adult volunteers, derived from academic populations.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
