

February 11, 1971

Mr. Charles Chidester
7 Quaker Lane
Enfield, Connecticut

Dear Chuck,

My associates returned from your laboratories pleased that the equipment seemed to be in order. As part of their enthusiasm, and in conjunction with some improvements in the ways we are recording EEG records here, they have written a set of guidelines which may be helpful. I would appreciate your reading these with the equipment at hand and checking the sequence of procedures.

Dr. East visited yesterday and is proposing a study of UR-7007 in the prison and this will probably be our first study.

Speak to you soon.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry

cc: A. P. Borger, M.D.

P.S. Separately Mr. Pavel is sending you the cables he promised for the oscilloscope.
