Dr. Marshall Gates
Department of Chemistry
The University of Rochester
College of Arts and Science
River Campus Station
Rochester, New York 14627

Dear Dr. Gates:

In checking through my files I find a letter of one year ago regarding your work with the trans isomer of cyclorphan. We are still interested in undertaking clinical studies with narcotic antagonists and I am writing to inquire whether the animal screening has come along sufficiently to permit such trials in the near future.

Good luck in your studies.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
