

June 4, 1970

Mr. Jared R. Tinklenberg  
Coordinator  
Psychiatric Residency Program  
Department of Psychiatry  
Stanford University Medical Center  
Stanford, California 94305

Dear Mr. Tinklenberg:

I very much enjoyed our impromptu discussion and even more, the reprints which are most interesting. The problem of drug altered immediate memory is possibly related to our studies of memory changes in ECT, and the data was even more interesting to us in this regard.

Thank you for the kindness in sending these reports and my best wishes that the studies continue as successfully in the future.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
