Dr. Joseph Zubin
Biometric Laboratory
New York State Psychiatric Institute
722 West 168th Street
New York, New York

Dear Joe:

I enjoyed your comments at the recent conference very much, especially the vignett of Freud.

We are now completing a study of simultaneous tactile stimulation and the averaged evoked response in our psychiatric population. I was impressed with your comments regarding the simultaneous auditory studies which you and Dr. Sutton were now reporting. I would be grateful for copies of any of your reprints and specifically any preprints that may be available at the present time.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
