

September 17, 1971

Dear Costas,

First, let me thank you for the courtesy and assistance you and your staff gave Dr. Volavka. He returned tired, but assured that the studies will provide the data we anticipated.

I met Costas Miras and discussed the continuation of the present studies, my desire to bring in some U.S. cannabis for trials, and the proposed extension of the studies you suggested. For the cannabis, he did not believe that a direct import license would be as useful as a shipment via the W.H.O. in Geneva, and indicated that he would make the necessary arrangements.

I will be in Europe on Wednesday, and should be able to spend a few days in Athens. I am scheduled to arrive on Saturday about noon or 1 p.m., and can remain until Wednesday morning. Costas Miras said that he would be available, and I would appreciate if we could discuss the following:

1. The data of phase I, and any help we can give you;
2. Phase 2, the specific protocols and timetables;
3. Equipment needed for part 2 (can you arrange to rent; may we lend you some equipment; or, can you make your tape recorder available);
4. Importation of U.S. cannabis, and the export of your samples for our assay;
5. your proposals for a new contract.

I hope this agenda is agreeable. I have requested accommodations at the Grand Bretagne, and would be pleased if I can meet a member of your staff on Saturday afternoon to go over the available data.

My best regards.

Sincerely yours,

Max Fink, M.D.
