Mr. Gordon B. Thomas
Director, Systems Engineering
Bio-Sciences & Technology Section
Hamilton Standard
Windsor Locks, Connecticut

Dear Mr. Thomas:

I have returned from my vacation and find that we have not yet received the equipment for preparing a tape for your use. I hope that we can do so soon.

In the meantime, I have received an invitation to visit the Charles Pfizer Laboratories in Groton, Connecticut, on October 4. It is my impression that the sessions there will be completed by 3:00 pm and if you are available, I would be willing to rent a car and come to Windsor Locks and visit your installation to see your equipment and continue our discussion. I am particularly interested in an opportunity to discuss with you your telemetry equipment and if this could be available, I would be grateful.

The discussions in Groton may go somewhat beyond 3:00 pm, so that you should be prepared to stay somewhat early in the evening. If these arrangements are agreeable to you, would you please call or write to me before the end of next week?

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
