

May 26, 1965

Dr. William P. Wilson  
Professor of Psychiatry  
Duke University School of Medicine  
Durham, North Carolina

Dear Bill:

I am writing to tell you that I have submitted both papers to Dr. Joseph Wortis, the editor of "Recent Advances in Biological Psychiatry." Before sending these on to him, however, I took the editorial liberty of checking the references in each of the reports to provide for parallelism in the symposium, I have had the references in both papers retyped following the requested style by the Plenum Press. Copies of the altered bibliographies are enclosed for your use in reading the proofs.

Thank you once again for your participation in this symposium.

Sincerely yours,

Max Fink, M. D.  
Professor of Psychiatry

MF:kp
