William R. Martin, M.D.  
Chief, NIMH Addiction Research Center  
P.O. Box 2000  
Lexington, Kentucky 40507

Dear Bill,

It was kind of you to express an interest in OI-30, (n-cyclopropylmethylnoroxycodone). I have just returned from London and under separate cover, am sending you 1.9 gram $\bar{a}$ , for your evaluations.

Should the compound exhibit characteristics that would stimulate our interest in clinical trials, I have been assured by the research staff at Organon that they would be prepared to engage in additional studies and production.

I hope something comes of this.

Many thanks for your interest.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
