

December 18th, 1972

Abraham Wikler, M.D.,
Professor of Psychiatry,
University of Kentucky School of Medicine,
Lexington, Kentucky.

Dear Abe,

I very much enjoyed our dinner in San Juan. I was inspired to plan the volume reporting the text of your earlier hypothesis, and indeed, spent most of Friday writing the outline. I also spent a good deal of time discussing with Al and Dick Resnick the steps necessary to test the extinction hypothesis. I hope I can stimulate this staff at the New York Medical College to undertake this study.

I am writing to ask whether you would send me copies of your presentation at the antagonist meeting and at the ACNP.

Meanwhile, I am enclosing a few reports from my laboratory that relate to the EEG program.

My best regards,

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
