

March 7, 1966

Division 3, 1966 Proceedings  
American Psychological Association  
1200 Seventeenth Street, N.W.  
Washington, D. C. 20036

Gentlemen:

Monday I submitted four draft copies of the report "The Scalp Recorded Averaged Evoked Response to Simultaneous Cutaneous Electrical Stimulation" for your consideration for the 1966 meeting of the American Psychological Association.

Page 1 had one line deleted, and I am enclosing four copies of a replacement.

Enclosed also are four figures, one set of originals and three sets of Xerox copies. Figure 1 is to be inserted on page 3 after line 3.

Figures 2, 3, and 4 complement paragraphs 1, 3, and 5 on page 4.

Thank you for your consideration.

Sincerely yours,

Max Fink, M.D.  
Professor of Psychiatry
