

March 4, 1968

Dr. Clive M. Tonks
Research Associate
Yale University School of Medicine
Department of Psychiatry
34 Park Street
New Haven, Connecticut 06519

Dear Dr. Tonks:

The principal references to EEG changes in the menstrual cycle are De Barenne and Gibbs; Amer. J. Obstetric Gynecology, 1942, 1944: 672-675; Lettich and Margerison, EEG Clin. Neurophysiol. 1961, 13: 606-611; Margerison et al., EEG Clin. Neurophysiol. 1964, 17: 540-544; and Matousek Research Reports, Psychiatric Research Institute (Prague) 9, 1967, 223-225.

In addition, there is an unpublished report by George Ulett and you can write to him at the Missouri Institute of Psychiatry, 5400 Arsenal Street, St. Louis, Missouri 63139.

The reprint you requested is enclosed.

Please give my regards to Dr. Klerman.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
