

January 10, 1969

Dr. Norman Pitts
Chas. Pfizer & Company
Groton, Connecticut

Dear Norman,

Enclosed is the summary requested by Mr. Firman.
I called your office for clarification, and when I was
told you were in Europe, I completed the report as best
as I could.

Your comments, as always, will be most welcome.

I am also enclosing a revised protocol for the
definitive EEG study (12-30-68). The earlier draft
had some errors in the EEG and Clyde scale data which
are corrected in this draft. Please destroy the earlier
draft (November 29, 1968) and replace with this copy.

My best regards.

Sincerely yours,

Max Fink, M.D.
Professor of Psychiatry
