DOCTORS

The physician is only nature's assistant — Galen

Never go to one whose office plants look sick — Smallwood

The practice of medicine is an art, not a trade; a calling, not a business — Osler

Some people think doctors can put scrambled eggs back into the shell — Canfield

The doctor must have at his command a ready wit as dourness is repulsive both to the health and the sick — Hippocrates

A physician is a person who works sixteen hours a day telling others to slow down or they'll get high blood pressure.

A doctor is a person who still has her tonsils, adenoids and appendix.

The physician cannot prescribe by letter, he must feel the pulse — Seneca

He who conceals his ills cannot expect to be cured — Proverb

Good medicine always tastes bitter — Confucius

She's the best physician who knows the worthlessness of most medicines — Franklin

The best doctors in the world are Dr. Diet, Dr. Quiet and Dr. Merryman — Swift

I wonder why ye can always read a doctor's bill an ye niver can read his prescription. — Dunne

A rule of thumb in the matter of medical advice is to take everything any doctors says with a grain of aspirin — Ace

One of the chief objects of medicine is to save us from the natural consequences of our vices and follies — Mencken

Dear Colleagues of the Class of '87:

I am delighted to add my congratulations and good wishes to those you will receive from family and friends. We await with great expectation reports of your continuing splendid performance. We anticipate momentous contributions to bio-medical science but, above all, we look forward to hearing that your patients are well treated and that your great gift to them is peace of mind. There is no higher calling than to a life of service. May each of you have a long and productive one.

Sincerely,

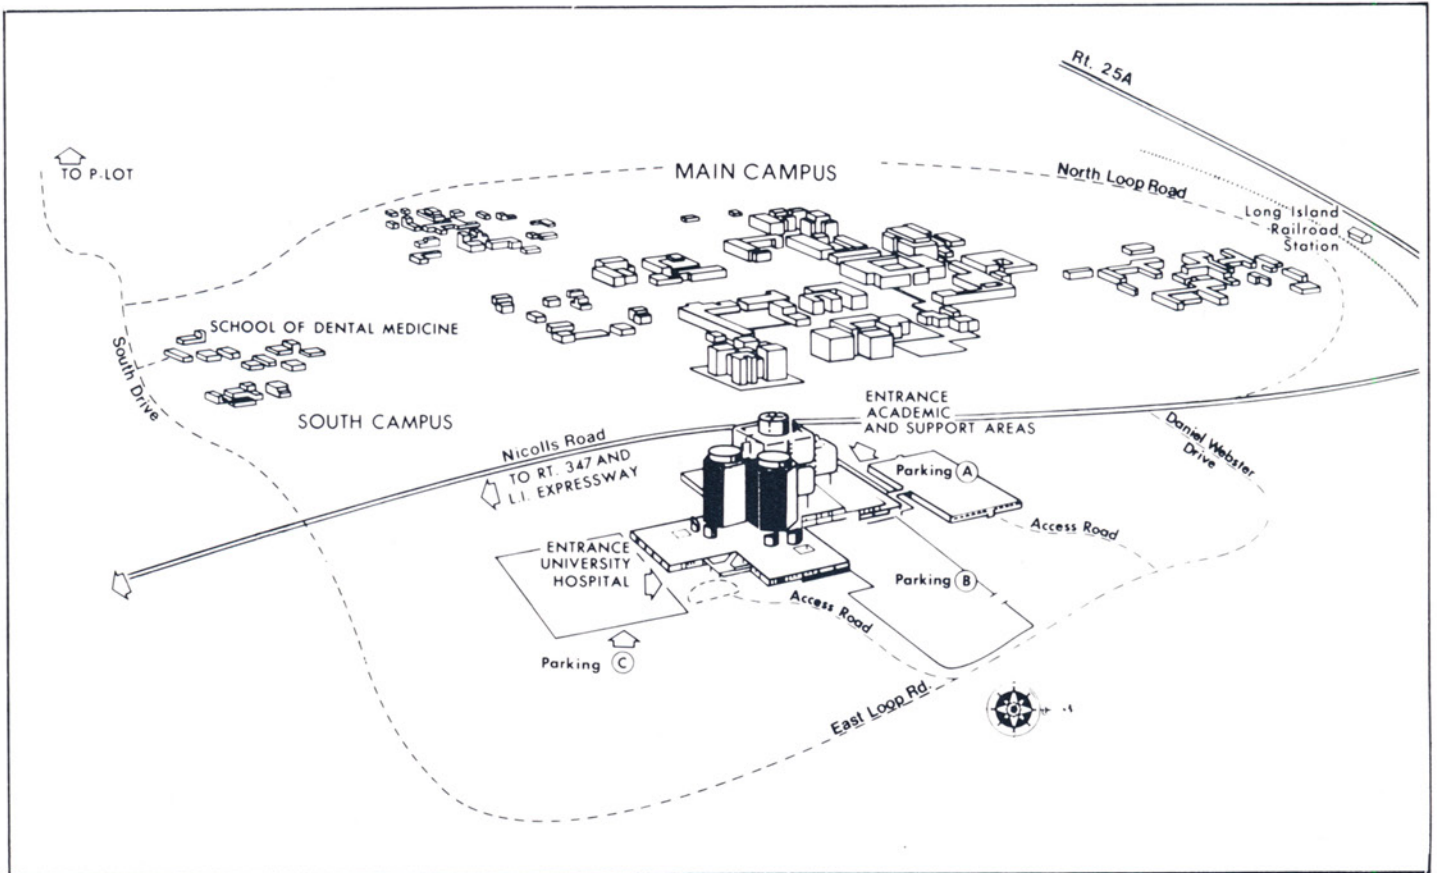

Marvin Kushner, M.D.
Dean, School of Medicine

It has been my custom to remember the various Classes of the School of Medicine by affixing a descriptive adjective that in some way typifies that class. One glance at the match results provides a suitable choice. I know not the attraction that binds you to New York, but even Fran Cantor or Mike Mercandetti, toying with the frigid white borders, did not cross. I would have asked Diane Ahlman what was wrong with her...going to Wisconsin, but since she had the great wisdom to take an elective in Pathology (and more important because I spent four very good years in Madison), I trust in her good judgement (the same for Seth and Lon in that fine neighboring state, Michigan). What of Alan, Ricky, Scott, Denise, Jamie, Cathy McHugh (Duke's a wonderful place), or John Weicha...they simply settled on suburbs. Those who went farther west: Hal, Kathy Weiser, Stacy are simply traitors! I had alternative adjectives...you were a congenial class, a group of mostly middle-agers (we know the exceptions...but still good natured), an amiable collection- quite sedate by '60s or '70s standards. It was even my good fortune to become acquainted with some of you who joined the hard core later on...for the clinical years. Since I have had closer interactions with many of you than in other years, and since these have been favorable I am happy to report, I will bid you the very best of successes under a canopy of fond memories.

You are entering medicine at an uncertain time. There is a lack of direction in terms of the provision of health care. Will we as physicians become employees of corporations and will the government set standards for what is proper care? Those are issues which may be central in decisions that you will have to make in the near future and I do not envy you. On the other hand you have reached the end of Part One of a long journey and I wish you every possible satisfaction that that trip can provide. Medicine is a very special field because it is more than a job, more than a profession- it is a way to live ones life. It has the potential to bring the greatest disappointments, views of incredible human suffering (ask any oncologist or physician burdened with the care of the AIDS patient). It may also serve you with rewards unlike those found in any other human endeavor. These seem very trite phrases but as years pass and you realize your many separate goals you will find it hard to express the satisfaction of helping others in novel ways. There is a great tendency in current times to let style of life intrude into our concern for the care of our patients. I think I know most of you- few will so succumb.

It will be with the very warmest feelings that I will share your graduation with you and our associations over the last several years will be remembered in mellow tones. I will look forward to reading of your accomplishments, your contributions to medicine, your continued growth. I can only extend to you the same well wish that I have to prior classes...may you derive as much personal joy and gratification from medicine as I have. Should you return to Stony Brook in years to come, I invite you to drop by and tell me that we helped start you in the right direction. Class of '87, The New York Class, I wish you and yours the very very best....

The following number system will be used to evaluate the student's performance.

1. Unsatisfactory 2. Satisfactory 3. Good 4. Excellent 5. Honors

A. History-taking

	1	2	3	4	5
1. Probes appropriately for needed information ^(from every orifice)	()	()	()	()	X
2. Takes a logical and thorough history (when awake)	()	()	()	()	X
3. Interviews the patient effectively (while being evaluated)	()	()	()	()	X

Comments:

Student is enthusiastic with a good fund of knowledge.

B. Physical Examination Skills

	1	2	3	4	5
1. Quality of overall physical examination ^{(PERK (one glass eye))}	()	()	()	()	X
2. Notes deviations from normal findings ^(looks in mirror)	()	()	()	()	X
3. Organizes the information from the physical findings (on a 16 pate H&P)	()	()	()	()	X

Comments:

Rectal and genital exams deferred.

C. Clinical Judgment and Diagnostic Acumen

	1	2	3	4	5
1. Interprets lab data (Recognizes asterisks)	()	()	()	()	X
2. Recognizes the degree and extent of pathology ^(can appreciate V1/V2 murmur)	()	()	()	()	X
3. Synthesizes historical, laboratory and clinical findings (as per resident's note)	()	()	()	()	X
4. Identifies all the patient's problems (and their own)	()	()	()	()	X
5. Overall assessment of diagnostic ability (calls 'em as he sees 'em)	()	()	()	()	X

Comments:

Failed to perform Gram Stain at 4 a.m. with six admissions.

D. Level of Medical Knowledge

	1	2	3	4	5
1. Able to identify common syndromes (like Babesiosis)	()	()	()	()	X
2. Able to explain pathophysiology (knows difference between pre-renal azotemia and pre-ejaculation)	()	()	()	()	X

Comments:

Always includes sarcoid and TB in every differential diagnosis.

E. Professional Rapport with Patients

	1	2	3	4	5
1. Overall ability to relate to patients (on the phone)	()	()	()	()	X

Comments:

F. Professional Rapport with Medical Staff	1	2	3	4	5
1. Works harmoniously with physicians, nurses, etc.	()	()	()	()	X
2. Accepts criticism without hostility (when not scolded out) (except when criticized)	()	()	()	()	X

Comments:

Attends liver rounds regularly.

G. Responsibility	1	2	3	4	5
1. Assumes appropriate responsibility for patient care (at Mt. Mc. Queens, VA)	()	()	()	()	X
2. Prepares reports, etc., efficiently and promptly (when having to present to Chairman).	()	()	()	()	X

Comments:

Student never missed lunch hour.

H. Quality of Case Presentations/Write-ups	1	2	3	4	5
1. Incorporates all relevant historical, lab, and clinical information after plagiarizing past discharge summary ()	()	()	()	()	X
2. Presents data clearly, concisely and logically ()	()	()	()	()	X
3. Ability to summarize a case (after referring to clipboard) (slipped on SOAP note) ()	()	()	()	()	X
4. Ability to discuss a case (even a train comes to a stop) ()	()	()	()	()	X

Comments:

Fails to take vital signs but includes serum porcelain level in every presentation.

I. General Comments on Clerkship Performance: Please write a short formal statement which can be included in the student's final Clerkship evaluation.

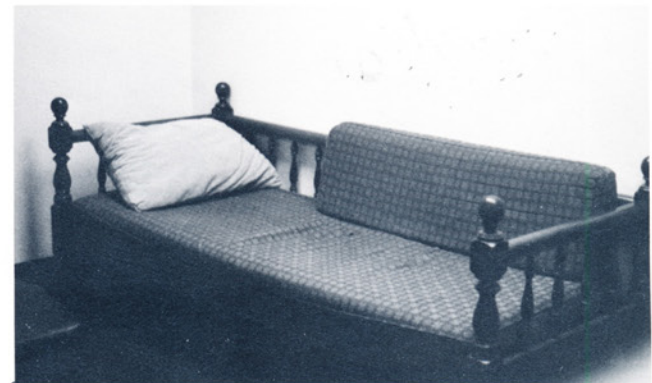

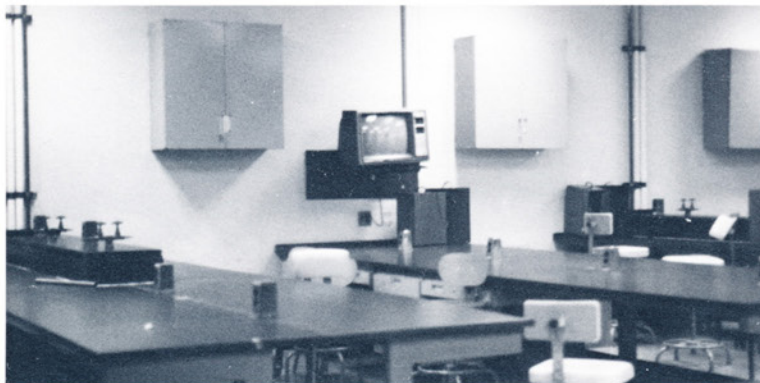

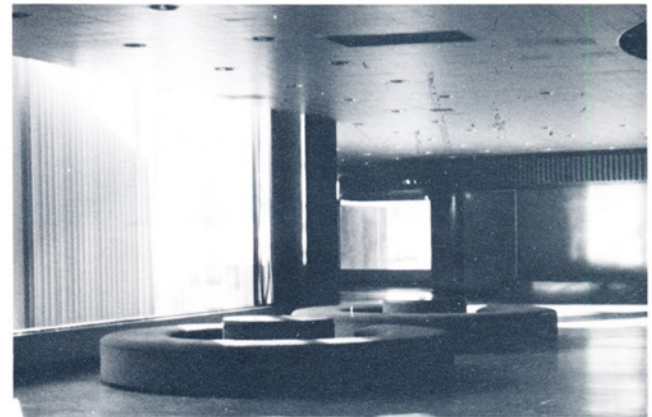

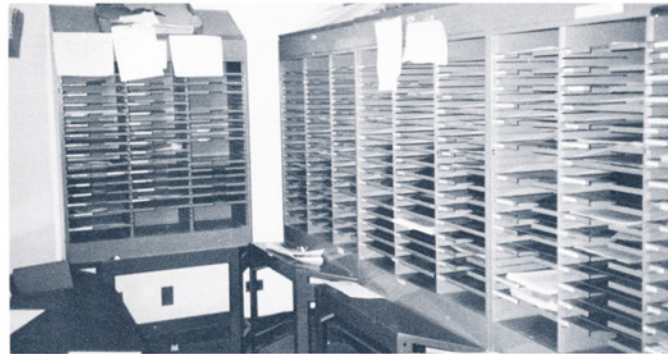

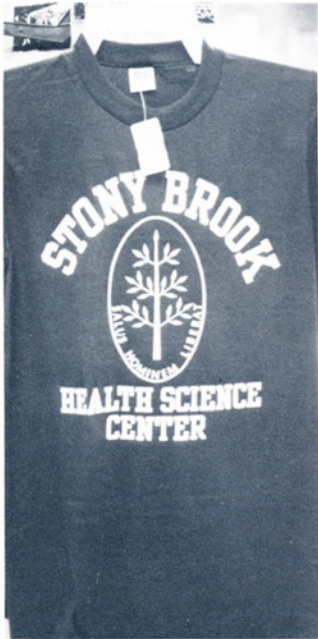

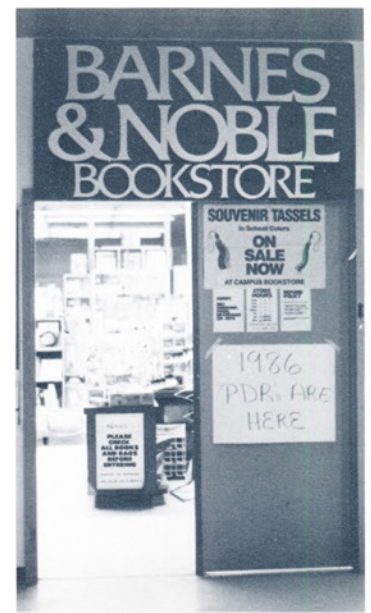

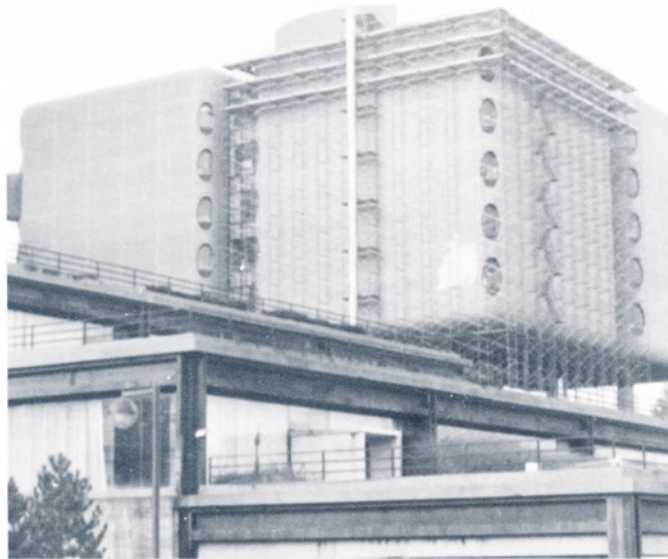

- ① Good Fund of Knowledge.
- ② Enthusiastic
- ③ Clinical Honors But did not achieve Honors grade on exam — missed by 101 points!

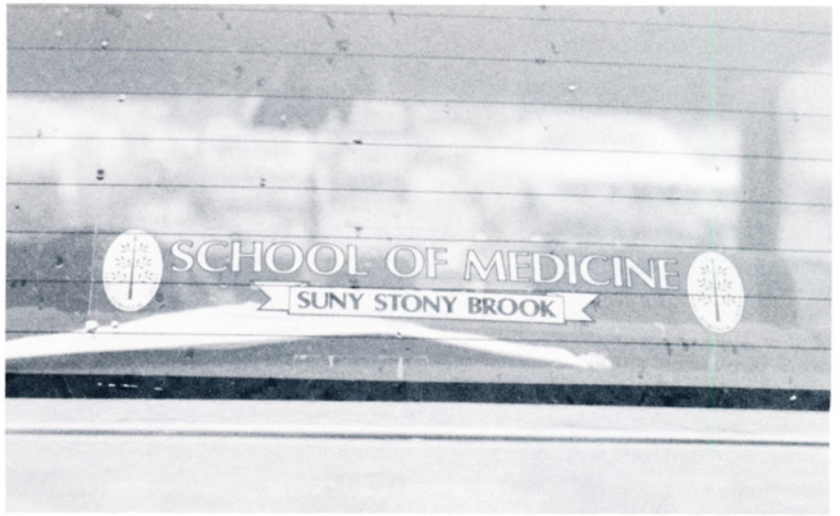

J. Grade: Pass Fail Signature of Preceptor Dr. L. Sherman

May 20, 1983

Shirly
400 Sherman Way
Miller Place, New York 11756

Dear Shirly:

The Committee on Admissions is delighted to accept you to the 1983 freshman class of the School of Medicine, State University of New York at Stony Brook. If you wish to receive your free Ginsu Steak Knife set, please inform us of your intent to enroll within 10 days.

This offer of acceptance is contingent upon your satisfactory completion of our admission requirements as well as the academic work to which you committed yourself in your application. If you are interested in Program B, our correspondence program, please make your checks payable to Note Service-Class of 1987.

The Committee on Admissions makes its decisions on acceptance independent of any information about a person's academic or social status. If you wish to seek a date you are invited to inform us in your response to this letter. We shall then forward to you the forms necessary to document your need, and when the Student Activities Committee has determined to what extent your need can be met by resources under its control, you will be promptly notified.

Again, congratulations on your acceptance. This offer is a testimony to your accomplishments, and a very apparent indication of the enthusiasm that your candidacy has generated. All of us -- the students, faculty, and our affiliate in Cancun, Denver, Miami, North Carolina, and San Francisco look forward to welcoming you to our school.

Sincerely yours,

Debra Gillers
Associate Dean for Admissions

LOOKING BACK

By Sylvia Seroussi

Looking back, what do you see
One long list of "OLOGY"
A stack of notes throughout the hall
A string of facts you can't recall.
When someone asks what did you do
A blur so big it blocks the view
Comes up and stands in front of you.
You took out loans till you were blue
You memorized to get you through.
You then forget the stuff you knew!
What did you eat, who did you see?
For 2 years in the library
You ate junk food and chewing gum
You had no dates, you met no one.
You saw psychiatrists just for fun
and everything was on the run.
And of your skills you have so few
When patients come and talk to you
You hide behind an index card.
And you thought reading
Books was hard!
Can you take a history?
Is it not still a mystery.
When someone says, "look in his eye."
Does not the fundus pass you by?
You study for the Boards all day
And hear an echo come and say
(It's Mrs. Perlman dressed in white)
She comes to talk to you at night!
She says — be sure to tranpose right
The dots you mark don't mark too light!
(Its dreams like this that give a fright)
What have you gained, how did you grow?
Your head is empty, vacant, gone
Your check book's showing zero, none.
Your love life's zilch, a simple NO
Tell me what you have to show
Before the road divides in two
And some of us miss some of you
Before we part and leave the books
And find ourselves in different nooks
And as its coming to an end
You still say, I made a friend.
And even if you think its true
That 4 years absolutely flew
With nothing gained and
Nothing new
I say no, it isn't true
If I lose track of what I do
And I forget the things I knew
And come from here without a clue
I'll certainly remember you!

HOLD ME DOWN

By Wilfredo Rivera and Peter Raffalli

I've got a picture
of Jack on my wall
It's an ugly reminder
While I'm memorizing
Objectives till dawn.

And though we've made lots of new friends
they're not alive anymore
Once we took up our knives
those that were circumcised
Now they're not anymore.

Refrain: Hold me down.
Jack, you better run and hide.
The smell stays with me
at the end of the day
All our friends stay away.

Look at our lives now
Watching Jungers so bald.
And our only delight
Was when Sue wore tight pants
That didn't last long.

Failed the first test by 2 points
Head and Neck was worth more
And I'd ask for a make-up
But I'm not sure
if I care anymore.

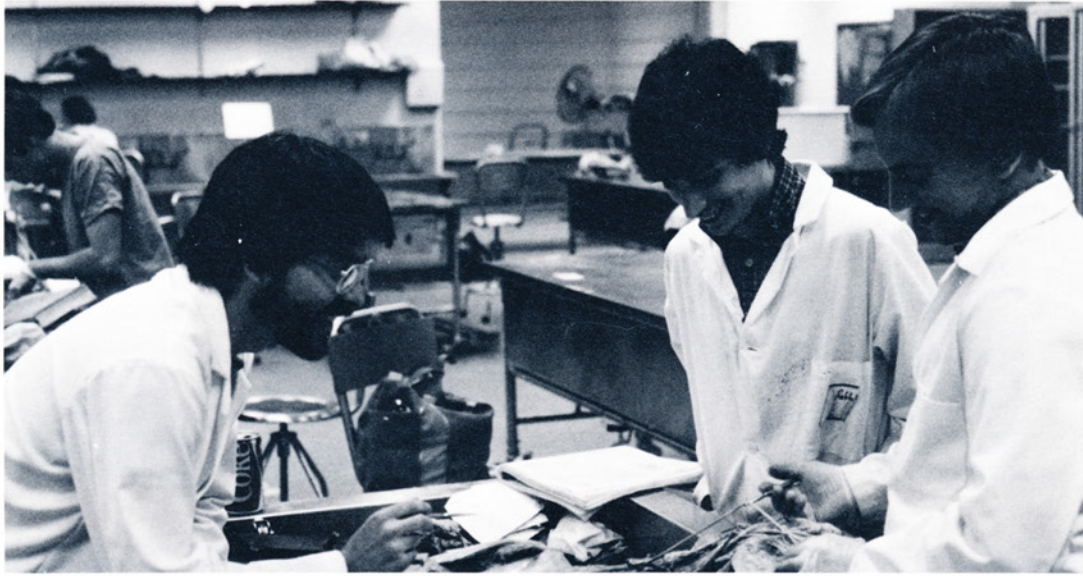

Refrain
In lab we were dreamers
Gone out of our minds
Both of us searching
for some stupid nerve
We know we'll never find.

Perhaps we should bag it
Randy is half out the door
And John Rizzi advised me
it's more satisfying
to wing it than to know.

Refrain
You ask if I like it
Well, what can I say
No other subject
has tangled my mind up
in quite the same way.

You know we really do like you
Please be nice with my grade
To come back in the summer is
a cruel and unusual
price to be paid!

POOR MEDICAL STUDENTS

There was a time, an MD was a special thing
With rewards that helping could bring.
Now they're a dime a dozen, can't even
get a match
They have us paying for our residency.

We are the poor, medical students
We are the ones without financial aid so
let's start begging.
It's a choice Reagan's making, he's
screwing up our lives
I'd trade it all away any day for an MBA.

I wanted OB, but the premium's too high
Don't want those lawyers chasing after
me.
Don't want to lose my home, my friends
& family
So instead, I'll choose psychiatry.

We are the poor . . .

When you're down and out and every
night's on call
And your patient's head is knocking on
the wall
(Well, well, well) You must realize, that
soon the sun will rise
And private practice looms before our
eyes.

We are the poor . . .

Sexual Dysfunction

PROM AND PREGNANCY

Historically Defined:

Impotence in ♂ - included failure to sustain an erection, achieve orgasm, low desire, premature ejaculation

Frigidity in ♀ - low desire, lack of arousal, fail to achieve orgasm, vaginismus

As opposed to
"older"-ology.
Nuerology

I. Points needs to be cleared from last lecture.

I was originally assigned to transcribe the lecture on amenorrhea this afternoon you can't believe how psyched up I was a topic such as that deserves careful consideration I was very disappointed that I had to switch I had wanted to write the entire thing like this so that you all would not forget what this disease means Cheri will do a better job of it anyway I'm sure

Lecturer: Dr. Nancy Peress (the doc from Brooklyn)

Transcriber: Liz Meller (the kid from Brooklyn)

Note: There was no tape for this lecture. The transcript is a compilation of my notes and last year's. Also, for more detailed info on bone I found the '68 note service to be particularly clear. And for a special treat try '74 note service -- Sokoloff was in rare form.

WARNING: never sit to Cathy G's right while she's drinking coffee!

Dr. Newman started off the lecture acknowledging the fact that we had a pharm exam, and that its spring, and we have the boards, and... what ever our reasons for coming or not coming to class are....the faculty may have their reasons for and against lecturing. He also said that although he did not wish to, he may elect to have the note service "turned off".

"His roots are green" announced Don to the rest of the class. There was a scuffle as more members of the class rushed towards Joe to get a glimpse of the recent discovery. Behind the mayhem and removed from all attention Gail Cohan quickly covered her scalp with a woolen ski cap which she always has nearby for just such an occasion.

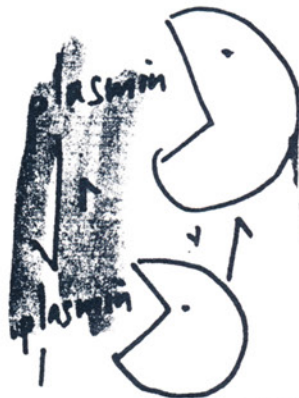

- 2. Cell wall synthesis inhibitors - the only cell wall present in eukaryotes is possibly the very thick cell wall which makes up Janice's Reality-Brain Barrier (RBB)
- 3. Protein Synthesis inhibitors - protein syn occurs in eukaryotes as well as in bact, but the latter's ribosomes are different and can be selected against.

VI. The Heartbreak of Psoriasis

An example of a thin filament would be Marc Rubman. Unlike most thin filaments however, Marc becomes an intermediate filament (or sometimes a thick filament) anytime Pete Gasparo is in front of him.

When we say communicated their intentions we are referring to suicidal intentions. Very often the comments made by the patients were: "This is the last time I'm going to kiss you," "I'll never see you again", "I've enrolled in the Stony Brook School of Medicine."

This wasn't you're everyday, normal, boring, sleep-provoking lecture. I guess it was really more like a seminar. Dr. Marco, (the infamous Dr. Marco, you know, the one from the Italian University of ObGyn on Park Ave. and 115th St.) presented us with one of his more recent cases, a woman experiencing placenta, praevia. Dr. Marco presented the case in a discussion format: he read

The last four years have been an interesting experience. I've struggled through with the rest of my classmates. I've had supportive parents and brothers who put up with me when I was unbearable at times. Thanks Mom, Dad, Joey, and Brian. I've had much help from very close friends who made the nights of studying tolerable. Thanks Gary. I've been especially helped by the very beautiful woman who became my wife this past August. Thanks Sally. And, above all, I believe I have been helped by a God who cares for me and has directed my path. Thanks Lord.

CLOSING REMARKS

*Please See Inside of Program

Registration at 3:30 p.m.
Nurses Center Plaza
(SC Level 3)

Dear Classmates,

The staff of KRONOS '87 would like to express their thoughts on their experiences working on this labor of love:

Meg Glasheen (Business and Financial Manager): We hope that you enjoy the yearbook as much as we enjoyed working on it.

Katie McHugh (Layout Editor): Creating this yearbook allowed us to see each other during this long-distance year.

Robin Gottlieb (Photography Editor): This is the culmination of four years that parallels our development as physicians.

Diane Barsky (Typesetter): Many special friendships... trials and tribulations.

Howard Mendel (Typesetter): We hope this yearbook brings back good memories for the Class of '87.

Joe Schwartz (Copy Editor): Labor of love.

Sue Fineberg (Editorial Assistant): This is our present to the Class of '87.

THE REST OF THE PLAYERS:

Stacey Yamasaki - Photography Editor

Christine Laine - Art Editor and Cover Design

Heidi Cohen & Ross Lieberfarb - Special Effects

I, too, hope that this book brings back some great memories of Lecture Hall 5, Anatomy Lab, Parties, Pot Luck Dinners, Colorful Faculty and Classmates and Clinical Antics. But, most of all, KRONOS '87 is meant to remind you of the friendships and common purpose we have shared during the past four years. As you read this, you may be in the trenches of internship, romping through your residency or, finally, practicing in your field of medicine. Whenever you do decide to pick up your KRONOS, enjoy it!

Special thanks to Rosalie and Shirley for keeping the mail and taking our phone calls, HSC Media Services, Bill Englener, '86, Newsday, for the picture of Sunwood, and especially to all of you who submitted pictures. We wanted to include as many people in the class in KRONOS as possible.

With lots of love,
Liz Melley
Managing Editor

THE STAPH

The Oath of Hippocrates

I SWEAR BY APOLLO, THE PHYSICIAN, AND AESCULAPIUS AND HEALTH AND ALL-HEAL AND ALL THE GODS AND GODDESSES THAT, ACCORDING TO MY ABILITY AND JUDGMENT, I WILL KEEP THIS OATH AND STIPULATION:

TO RECKON him who taught me this art equally dear to me as my parents. to share my substance with him and relieve his necessities if required; to regard his offspring as on the same footing with my own brothers, and to teach them this art if they should wish to learn it, without fee or stipulation, and that by precept, lecture and every other mode of instruction, I will impart a knowledge of the art to my own sons and to those of my teachers, and to disciples bound by a stipulation and oath, according to the law of medicine, but to none others.

I WILL FOLLOW that method of treatment which, according to my ability and judgment, I consider for the benefit of my patients, and abstain from whatever is deleterious and mischievous. I will give no deadly medicine to anyone if asked, nor suggest any such counsel; furthermore, I will not give to a woman an instrument to produce abortion.

WITH PURITY AND WITH HOLINESS I will pass my life and practice my art. I will not cut a person who is suffering with a stone, but will leave this to be done by practitioners of this work. Into whatever houses I enter I will go into them for the benefit of the sick and will abstain from every voluntary art of mischief and corruption; and further from the seduction of females or males, bond or free.

WHATEVER, in connection with my professional practice, or not in connection with it, I may see or hear in the lives of men which ought not to be spoken abroad, I will not divulge, as reckoning that all such should be kept secret.

WHILE I CONTINUE to keep this oath unviolated, may it be granted to me to enjoy life and the practice of the art, respected by all men at all times; but should I trespass and violate this oath, may the reverse be my lot.

It's not the hospital that makes our hospital.

At Southside Hospital, you'll find some of the most advanced health care facilities anywhere.

Everything from a computer scanner that examines an entire adult in just seconds to a Special Care Unit just for newborns.

But, important as it is, high-tech hardware isn't what makes health care so special at Southside. It's highly dedicated people.

The third-year resident who watches over a critical heart patient all through the night.

The dietician who serves up something really tempting for a toddler who won't eat.

The nurse who's there with a comforting word or a valuable piece of advice without being asked.

The busy physician who's never too busy to explain a treatment or calm a concern.

People who care enough to go beyond what's expected of them. They're what Southside Health is all about. And what health care is all about.

Nursery School Days
Are Over!

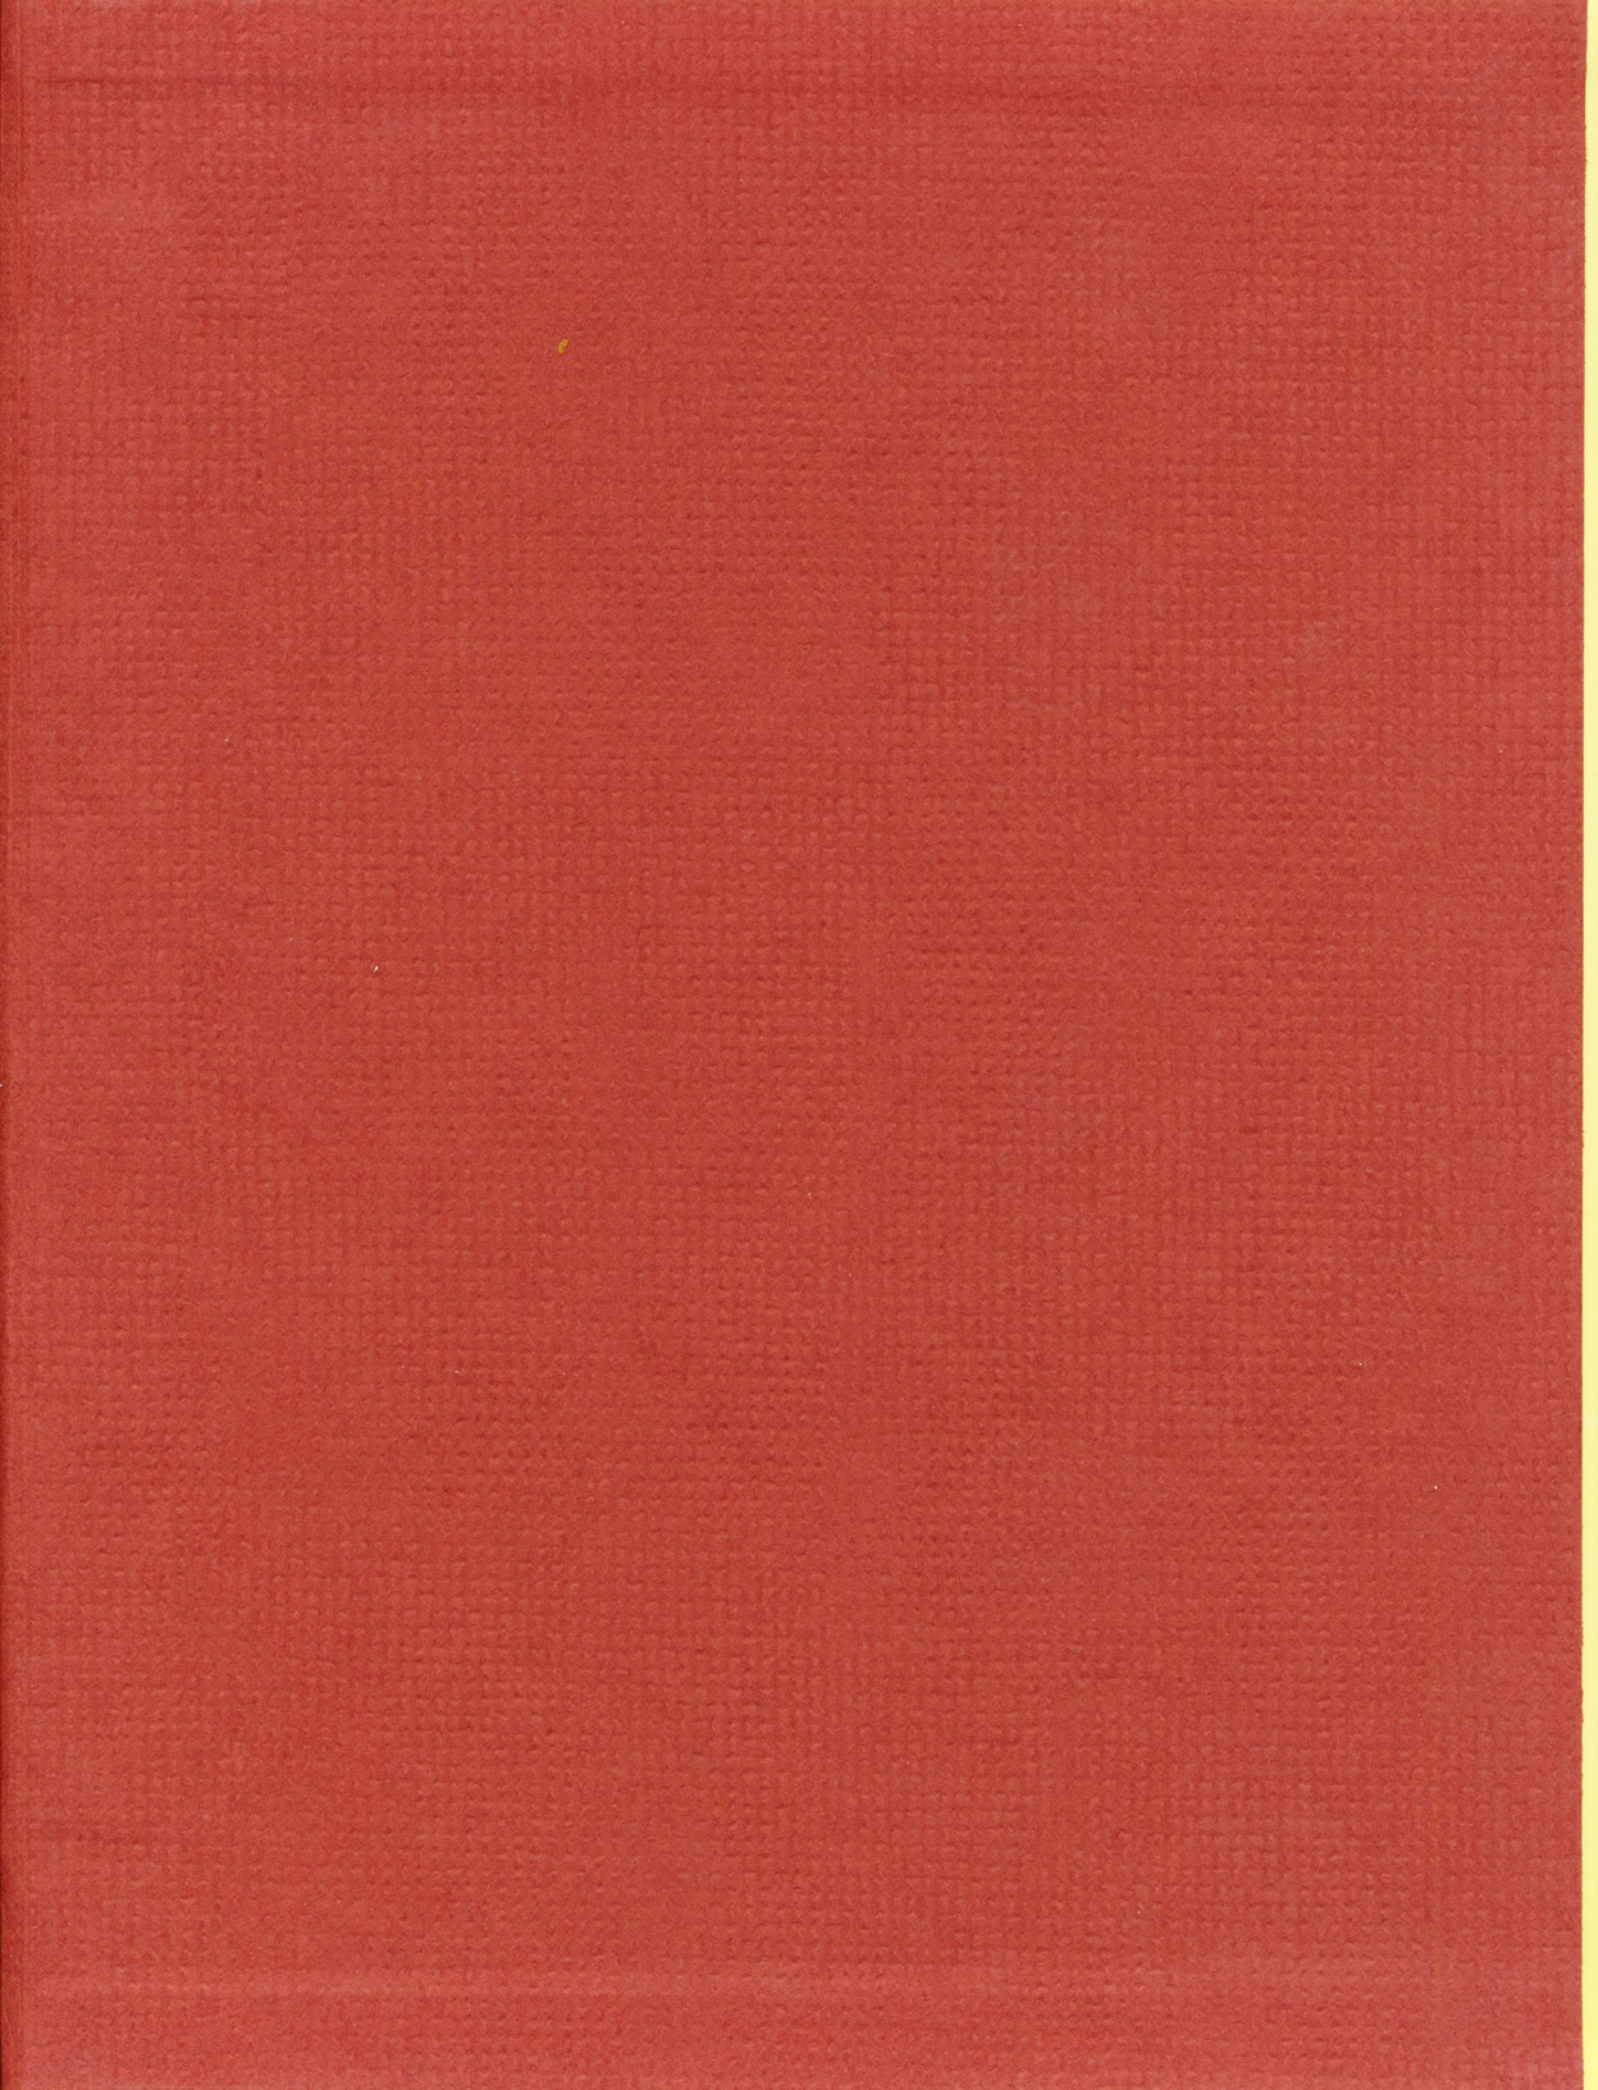

You've learned a lot more
than you knew before,
and everyone's
so proud of you!

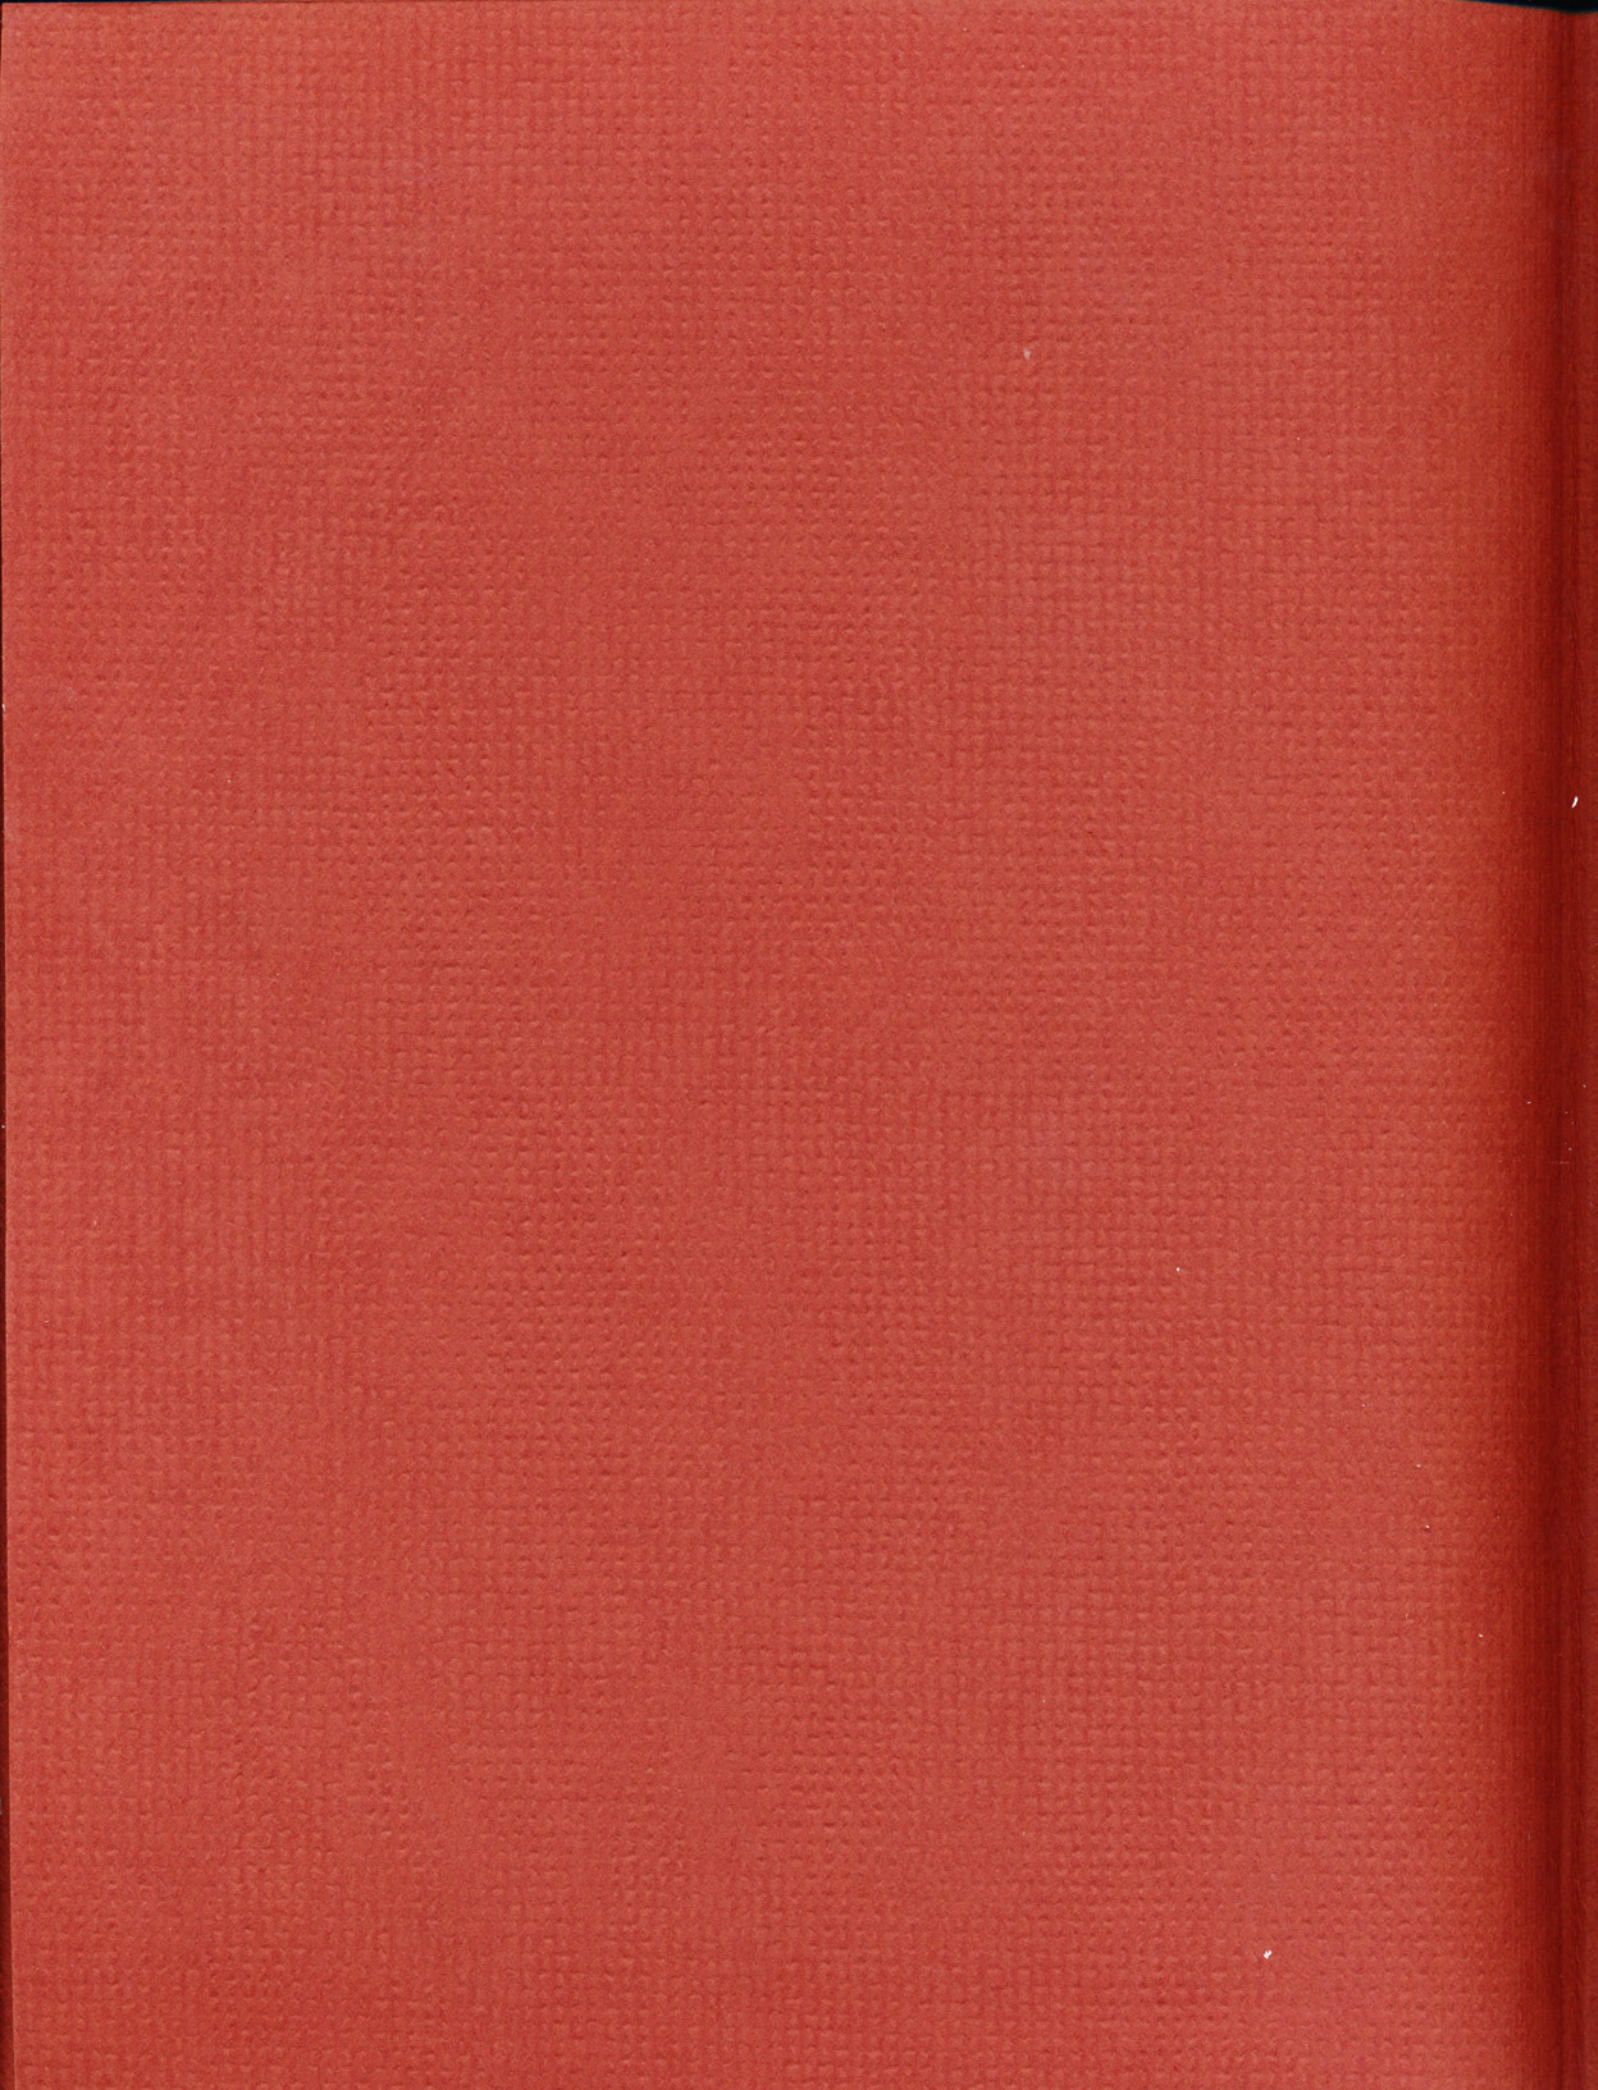

HAVE FUN ALL SUMMER

Do not stand there, do not weep,
The resident physician does not sleep.
Their brightness glows in the soft starlight,
They are a beacon in the night.
The resident is trained, experienced and skilled,
Their attempts to help you will be fulfilled.
They will be as gentle as the autumn rain,
They will help with problems and alleviate pain.
Their white uniforms are wrinkled and dirty,
Their twelve hour shift feels like thirty.
A feverish child is treated with a gentle hush,
The injured repaired with a soothing touch.
The pregnant are calmed and reassured,
The demanding ones have to be endured.
The cancer patient receives sincere empathy.
The suicidal patient awaits psychiatry.
The tired staff responds to the code.
Their fatigue wanes as they follow the mode.
It is successfully performed.
Now, the family must be informed.
Even in the early morning cool air,
The patients are coming there.
Whomever the blinking ambulance brings,
A million patients with all sorts of things.
The real MASH unit lives there.
This is the actual St. Elsewhere.
Do not stand there, do not weep.
The residents are here.
They do not sleep . . .
