A lot of people have wondered how, or even why, the Stony Brook School of Medicine, Kronos, got its name. Most of those asked, thought that it was cleverly named after Chronos, the Greek God of Time and father of Zeus. The actual explanation baffles the mind. Apparently some of the witty members of the class of 1980 thought the Health Sciences Center bore a remarkable resemblance to an evil robot in a low budget 1950's sci-fi flick. The anti-social automaton's name? You guessed it-Kronos. Here is the cover of that first yearbook, a tongue-in-cheek replica of a typical horror movie poster.

Here is a bit more folklore for you. Look at the picture below, and squint a little. Now, if you are doing this correctly, the hospital towers of our beloved University Medical Center forms a "U." Now squint harder, because this one is a doozie... Look closely at the Health Sciences Center... Do you see it? Yes, it is an "H." You have passed the most difficult part. Put those two letters together to form the anagram of the University Hospital ("U.H."). Legend has it that it was designed this way to aid the helicopter pilots in finding the right hospital. Ten years later, the administration painted a big red cross on the ground so they would finally land on the correct side of the building!

Just hangin' out...

TO THE CLASS OF 2001

Dear Class of 2001:

Each year the medical school celebrates the collective and individual accomplishments of each graduating class. So what makes the Class of 2001 so special? By the numbers (academic performance, gender, ethnic and geographic distribution), you look much like your predecessors. Yet each class has its own persona and style, and in my judgement you have earned special distinction in several important areas.

1. INVOLVEMENT AND SUPPORT OF EACH OTHER: The Class of 2001 has hung together very well. Your early involvement in leadership of the Medical Student Congress, The Wellness Committee, the active participation in intramural sports, and your demonstration of amazing talent in the annual Talent Show and the Evening of the Arts represent communal efforts that I will always associate with your class.
2. INVOLVEMENT IN SERVICE ACTIVITIES: Your class has carried the tradition of extracurricular service to a new level and just about every social justice cause has been advanced during your tenure. The Seabury Barn Project and the C3 Project are two major contributions that are uniquely linked with 2001 graduates.
3. EQUANIMITY: During your four years, the Class of 2001 has evolved a persona of grace under pressure and a purposeful calm in approaching major undertakings such as the Internship Quest and the USMLE exams. You have been rewarded with great success. From my perspective, you have been trusting and easy to work with in solving problems, and for that I am highly appreciative.

Finally, I have had the privilege to participate in the formative professional lives of more than half of all students who have graduated from this medical school and you will always have a very special place in my heart as my "last class." I am profoundly grateful for the warmth you have shown me and wish you all the best.

Pierce Gardner, MD

To the Class of '01,
The 'Specialist' Class

Dear Doctors (or as I write, 'almost' doctors): It is with great pleasure that I write to you, the Class of 2001. I was planning to call you the 'Millennial' Class because you are truly graduating in the first year of the new millennium. It has become apparent to me that it would be more fitting to describe you as the 'Specialist' Class since to my recollection, your class has fewer individuals seeking careers in primary care than any previously. Even more striking is the inclination towards surgery and the surgical specialties. For a school that has made an effort to engage you in Family Medicine, we have missed the boat or perhaps you have chosen the airlines to reach your destination. In terms of accomplishment you are amongst the very best. A class without strife, a class that in terms of its post-graduate placement and academic excellence continues the rising curve that over the last 5 plus years has been a trademark of Stony Brook. Of interest to me is the evenness of capability. In your class many stand out for many reasons and it is much harder to identify people who so far depart from the class spirit that they come immediately to mind. I won't easily forget Nell Maloney who, in the first year had quite an interaction with me over lobular carcinoma in situ. I think (hope) we became friends. I greatly admired the talent in your class. I will long remember the Hot Flash Dancers and the Testostertones. Not only because of their ability but because it was one of the rare times that a measurable participation by the Fourth Year in Pot Luck was evident. I could hardly avoid commenting on Research Day. The presentations by Samara, Tara, Dan, Jay, Paul and Mohan were truly excellent. I wonder where Adam plans to wear my lab coat. I can even see a potential group practice in ENT: Altman- Chernobilsky-Coelho-Payne-Ruffy (hope no one was offended) but it is extremely unusual to see so many in a relatively small class pick that specialty. Maybe Dr. Shindo left a thyroid nodule somewhere for you to resect but I don't think she misses many. The quality of Programs that you matched to and your individual success rates will be an inspiration to those who follow. Enough said. Let me wish you every success and hope you find as much pleasure in the practice of medicine as I have. Let me hear and read of your triumphs as there is little that provides as much pleasure for a teacher as the success of her/his pupils. If by chance I ever require your ministrations, deliver them with both skill and empathy.

May good health come to you and yours- there is no greater blessing.

With fondness, Frederick Miller, M.D.

FAREWELL TO THE CLASS OF 2001: Last year at this time I vowed never to write another "Farewell to a Class" letter. I had run out of clever things to say and didn't want to be remembered only for sentimental pap. However, I couldn't turn down a request from Nell and Spencer. After all, I have always viewed Nell as an anatomy graduate student won over to the dark side (not a nice thing to say about your chosen profession), and Spencer threatened to infect my computer with an incurable virus. But even more persuasive was the fact that although I love all my classes equally, I love some more equally than others. I smile whenever I recall the outstanding dancework of Joyce, Allison and their fellow Hot Flash Dancers, Samara's Big Mac juggling/recitation, Owen's poetry, Frankie-Lynn's singing, Lia's winking patellae, the diagnostic acumen of Chris and Danny (who can spot a gouty tophus at 20 feet), Pete's email messages from the operating room at Sloan-Kettering, Boris' conversation to a born-again anatomist, and too many other abilities or quirks to mention. One tradition I have in these farewell letters is to read your evaluations of the gross anatomy course, looking for extraordinary but forgotten insights. Members of your class said many nice things about the course in general (e.g., "I learned an immense amount of information that is neater than anything I've ever learned before.") and about Sue, Bill, Callum and me, but one of you made this very astute observation: "Stern's surface anatomy lectures were as much a waste of time as they were a way for him to amuse himself with colored chalk to create modern art." I have been found out, but keep it to yourselves.

Well, what's a good-bye letter without saying good-bye. A number of us on the faculty have put considerable effort into making Stony Brook a fine medical school, but none of that would mean anything if the graduates didn't represent us in a manner that brought credit to the institution. I know with certainty that your class will do more to enhance the reputation of your alma mater than anything the faculty might do. Additionally, and more important to an old guy like me, I know that you are physicians in whose hands I would be content to trust my own well-being. I will miss so very many of you. But being out of sight does not mean you have to be out of contact. Send me emails telling me about your lives. Show up at your class reunions - I will. And finally, every once in awhile have a shot of Jack Daniels for me, but only when you're not on call.

Jack Stern

Dear Class of 2001:

It is a little difficult to know what to say to a group like you. Perhaps a place to start is to note on some of your influence on the institution. Your class was selected by then Associate Dean for Admissions Debra Gillers who quit her job here a few weeks before your arrival and joined a rival institution. Your passage through medical school was under the aegis of two deans who, for whatever reason, left as well. Ann Richmond, our first and arguably best Vice Dean for Academic Affairs, departed after working with and for you for two years. Associate Dean for Academic Affairs Pierce Gardner proved the most durable but even he finally resigned his post in December of your senior year. I can't be sure, of course, but there is some reason to believe that had your undergraduate medical education extended any longer, Associate Dean Jordan would have been next.

What might it be about you that had such a dramatic effect on your academic administration? I'll have to admit up front that my theories are pure speculation, but they are based on knowing some of you far too well!

- It is very disconcerting to faculty and administrators to see students, normally fastidious about their studies, bumping and grinding their way across the Galleria floor in an obvious effort to addle middle-aged minds.
- The class was over-represented by food service professionals. I don't mean those of you who tended bar (or frequented them) or those of you who earned a living waiting and bussing tables. I mean people with far more unusual gifts. One of you is an emeritus professional pastry chef who steadfastly refused to produce life threatening desserts for the deans. Another earned notoriety, if little income, juggling food items – in particular hamburgers – while simultaneously singing menu descriptions.
- The class was loaded with gifted, if somewhat bizarre, musicians. There is a bald guitar player, among other string players, who seemed to enjoy teaming up with straight pianist of Portuguese heritage. An opera singer with lots of hair was heard above the piano played by a musician-counselor from the dean's office. Some of your musicians were given prestigious grants, presumably unrelated to a plot to keep them off stage.
- Or how about those of you who were so much more sophisticated about computers and computing than your erstwhile teachers that you had to guide us into webworld.

The good news, of course, is that you are going to wonderful institutions and, if your pattern holds true, the administrators at those institutions should soon be looking for work. Just as well since we now have positions to fill here.

All kidding aside, your class has made important contributions to the school and enriched my life personally. I wish you well in your lives and work.

Peter C. Williams

Dear Class of 2001,

As you graduate, I want you to remember that what you are doing should be fun. Yes, it will be hard but that attribute is what makes it great. If it was easy to be a doctor, everyone would do it.

You all are leaving an environment that is, to a certain extent, nurturing (not everyone will love you as the surgery residents have), and are going to one where the responsibilities are great, where error has grave consequences and where excellence is demanded of you. Many if not most of you will be sleep-deprived. Some will be frustrated about mistakes made or progress in one's career that is seemingly too slow or bought at too high a price. One day you may even wonder if you should get up and go to work.

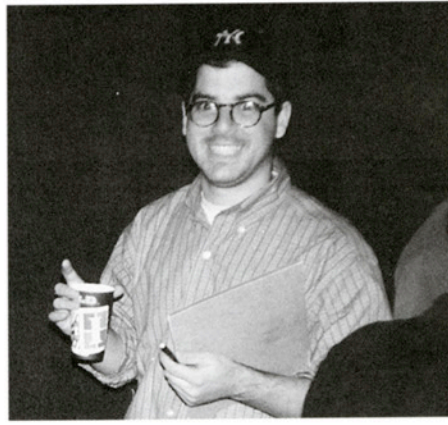

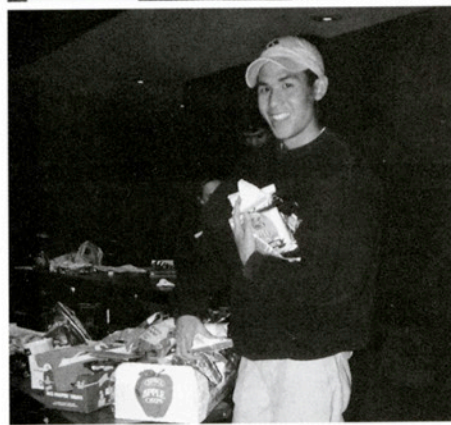

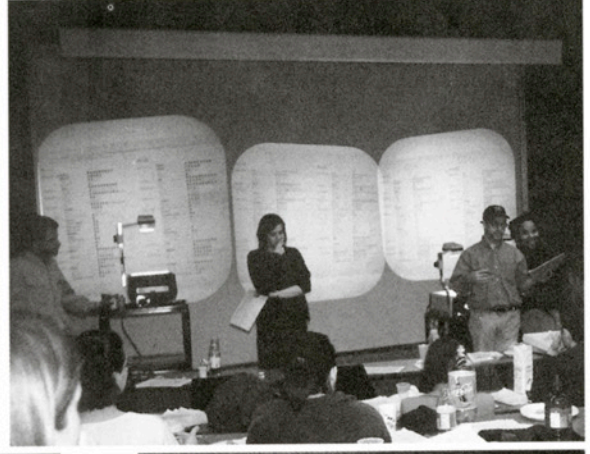

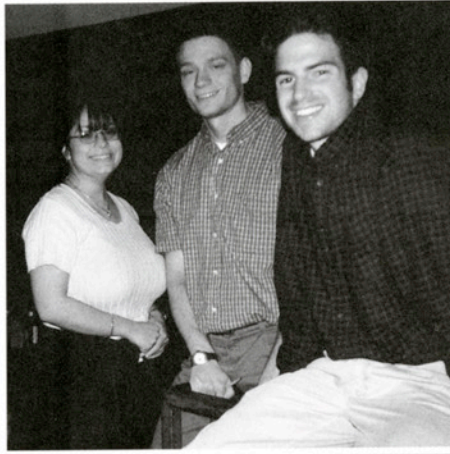

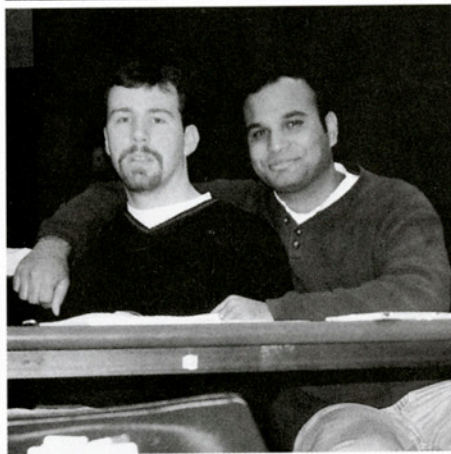

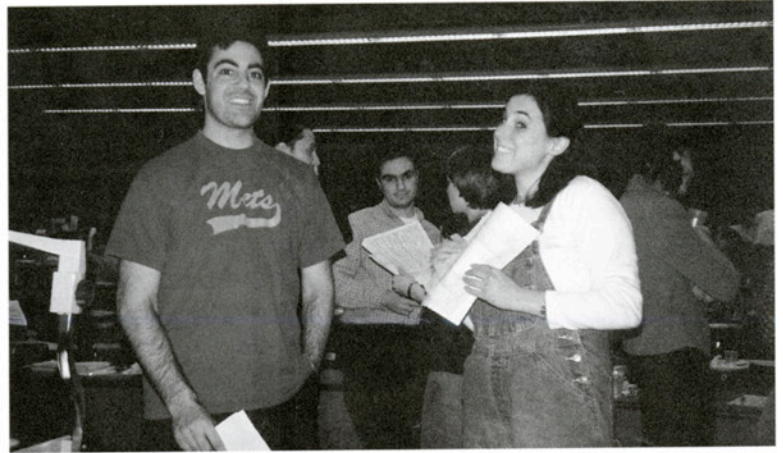

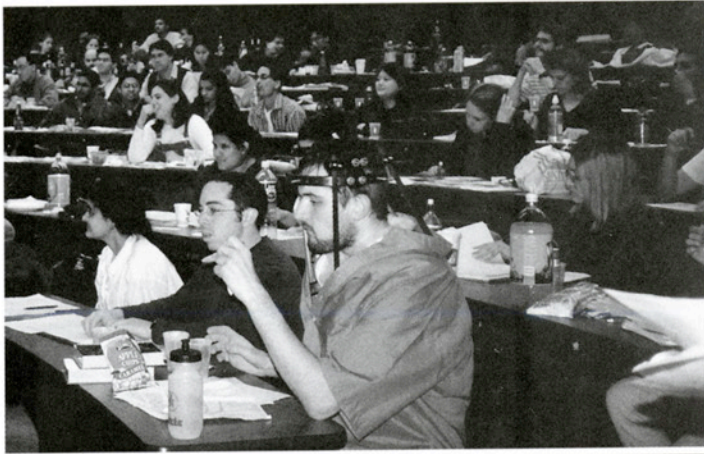

At that time, you can forget why you went to medical school. It is then, when you are in danger of becoming that resident or attending that you least admire, that you should try to remember the words of someone whose deeds as well as her words are more eloquent than mine:

"You may be exhausted with work, you may even kill yourself, but unless your work is interwoven with love, it is useless. To work without love is slavery."

I have been proud to have been your teacher. Do well. Be excellent representatives of your school.

Joseph J. Sorrento, M.D.

Congratulations to our Tara and Jared

**with pride for all you have been, with joy for all you are,
with hope for all you'll be, and with love... for always**

Mom, Shel, Tracy and Carly

Dear Tara and Jared,

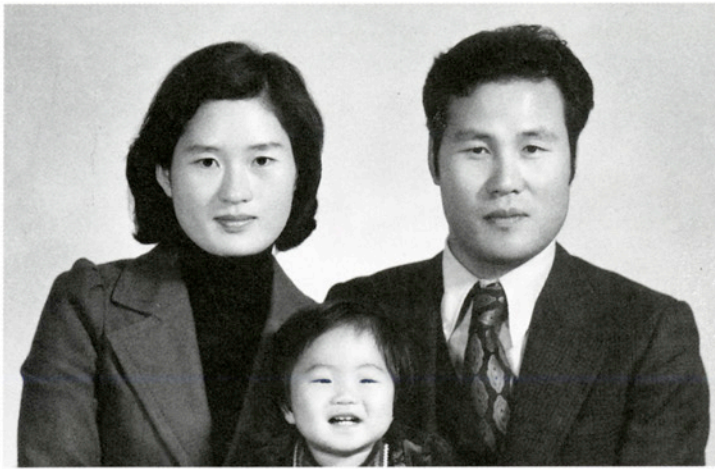

Congratulations on your extraordinary performance in medical school. You set high goals, met and exceeded them, and demonstrated commitment, perseverance, and wisdom.

We are thrilled as you begin your general surgery residencies at the New York-Presbyterian Hospital/ Weill Cornell Medical Center.

Our love, pride and admiration will be with you always.

Congratulations to the Class of 2001, Stony Brook School of Medicine.

Love,
Mom, Dad, Brett and Kramer
The Huston Family

CONGRATULATIONS

DR. CHA!

Dear Jay-Jay,
What a long ride!
Now you have arrived!

Congratulations!
Much love,
Robyn,
Mother,
Dad,
Sheila,
Bob
and Family

Congratulations and best wishes

DR. ANGEL TU

&

The Class of 2001

*Words can't express how proud we
are of all you have accomplished.*

May all your dreams come true.

With all our love,

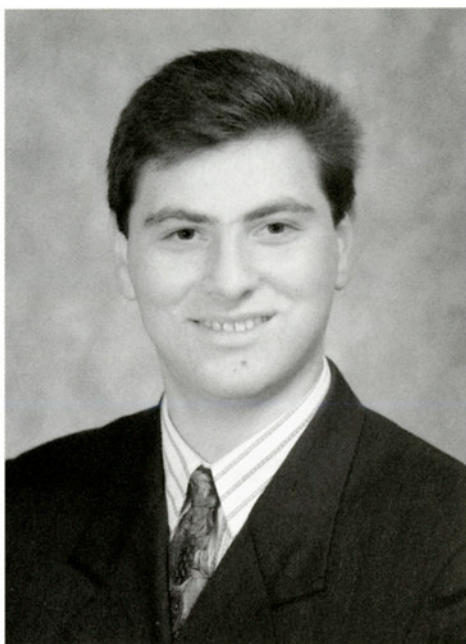

Your "in-laws"

Anita, Ed, Anne, Claude & Annette

Vanessa,

*we have been blessed in so
many ways with a daughter like
you. We are so proud of you.
Always thank God for this special
gift he has given you.*

Boris!

Congratulations! You have always given us so much love and joy! We are so proud of you for the job well done. May your life be all you reach for and all you dream of.

Love Mom, Dad and Alan.

Dearest Eva,

You dreamed of accomplishing great things and then did your best to make your dreams come true. You have earned every success that's come your way, and on your graduation, you should be filled with pride, satisfaction, and all the happiness you deserve. Congratulations and best wishes for a great future. Your relatives in Germany, Greece and Australia are also very proud to have a Doctor in the family!

— Your parents, Kaiti and Volker Swoboda

From the First Graduation.....To The Last

Congratulations JANA.....the second coming of "Dr. J"

We love you.....Mom & Dad

Alex Rosioreanu

What else may we wish for you, son?

"If you can talk with crowds and keep your virtue, or walk with Kings - nor lose the common touch,

If neither foes nor loving friends can hurt you,

If all men count with you, but none too much;

If you can fill the unforgiving minute with sixty seconds' worth of distance run,

Yours is the Earth and everything that's in it,

And - which is more - you'll be a Man, my son!"

----Rudyard Kipling

Congratulations for attaining your goal and wishes for future success.

Mom and Dad

William S. Asch, M.D. Ph.D

To Daniel H. Coelho, MD

Our hearts are filled with joy as we celebrate and congratulate the fine and caring young man who fulfilled his dream.

And to all the Stony Brook graduates, Class of 2001, we wish you success and happiness.

Love,
Mom and Dad
and the whole Coelho family

Dear Moshe,

Congratulations on your graduation from medical school. We are so proud of you! We wish you the best of luck in your residency at North Shore; they are very lucky to have you on their staff.

We love you!

When you were young,
We knew you had great promise

Joyce D. RUBIN, M.D.

You have achieved your goals with persistence,
discipline, and determination.

You are and always will be
"Daddy's Little Joy-Joy".

We love you with all our heart & soul.
Congratulations from the bottom of our tiny toes!
Lauren & Ethan & Baby Olivia

nce upon a time, long, long, ago, there lived a little boy in a quaint village on the North shore of Lengthy Isle. He could be seen sorting his earthworms (Come to think of it, where did that big one ever go?), rescuing tadpoles from an ugly fate at the hands of fellow campers, or investigating the fascinating constructions of the paper wasp. He so loved Nature's creatures, and they loved him in return—particularly that black Labrador at De Olde Feathers Inn.

Now, years later, he expresses his passion and caring for living beings through his interest in medicine (among other things). Strong work!

Hearty congratulations, David Axelrod, M.D.

May you go from strength to strength!

With pride and love from your family

Judy, Warren and Elisabeth

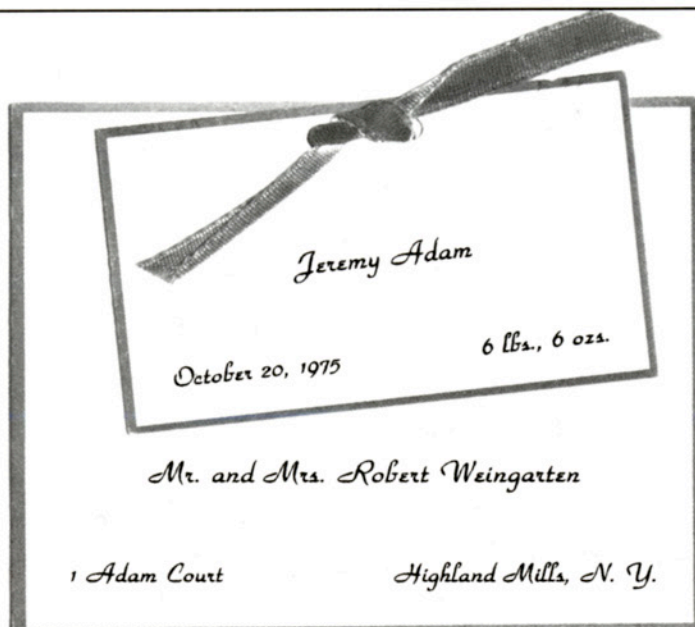

!!!To Our Dearest Melanie - Best of Luck to You!!!

We congratulate you on successfully completing medical school. We are extremely proud of your achievements. We encourage you to use your puissant determination to pursue your dreams. We hope that you will use your impeccable energy to fulfill your personal expectations. To our daughter Melanie, we thank you. We appreciate your incessant struggle to excel. To our granddaughter, we salute you. Grandpa and I, stand admirably by your side. We thank God for him giving you to us. We cherish your compassionate heart and your companionship. To my sister, Carpe Diem. Thanks for your guidance. I will never forget it.

With Love... Babi, Dedi, Mami, Tati, and Joey

A very precocious 6 month old loved her multi-colored alphabet blocks. Every night she made sure only the blue and green sides were face up in neat rows. When she went to sleep her mischievous mom would purposely reverse them so that the red and yellow sides would be showing. Each morning the adored girl would check on them, scowl at her mom and then right them to her specifications! We knew we had a very special child who would determinedly attack life, accept it only on her terms and achieve every goal she set for herself. We weren't disappointed.

Samara, you had all the building blocks then to become a great orthopedic surgeon now. You are a parent's blessing. You awe and inspire us. Never stop dreaming and never lose your sense of adventure. See you in outer space!

Love for always and a day. Mom & Dad

**Congratulations to all the special graduates in the
Class of 2001.**

May all your dreams come true!
