Look to this day
For it is life
The very life of life
In its course lie all
The realities and truths of existence
The joy of growth
The splendor of action
The glory of power

For yesterday is but a memory
And tomorrow is but a vision
But today well-lived
Makes every yesterday a memory of happiness
And every tomorrow a vision of hope
Look well, therefore, to this day.

FACULTY AND ADMINISTRATION

Jordan Cohen, Dean

Med School Gets New Dean: Jordan Cohen is Appointed

By Joseph Salerno

One of the nation's leading kidney disease experts, Dr. Jordan J. Cohen has been appointed dean of the School of Medicine at Stony Brook University. The appointment came into effect on July 1st.

Cohen graduated with honors from Yale and the Harvard Medical School. University President John Marburger said, "he (Cohen) is a leader in American medicine."

He is a member of the American Board of Internal Medicine and chairman of the critical care unit. He is a past chairman of the nephrology sub-specialty committee and has recently been elected to the Residency Review Committee in Internal Medicine. Cohen is chairman of Educational policy for the American College of Physicians. He also serves as Vice Chairman of the Board of Regents as well as President of the Association of Program directors of Internal Medicine. Cohen has authored three textbooks on kidney disease, eleven book chapters, and numerous scientific publications.

Cohen is dean of all academic programs at the medical school. He is involved with senior faculty recruitment, and clinics at University hospital. He also serves as a liaison when

dealing with other health care institutions. "I hope to maintain the reputation of the school as an excellent facility for the instruction of the basic and clinical sciences," said Cohen.

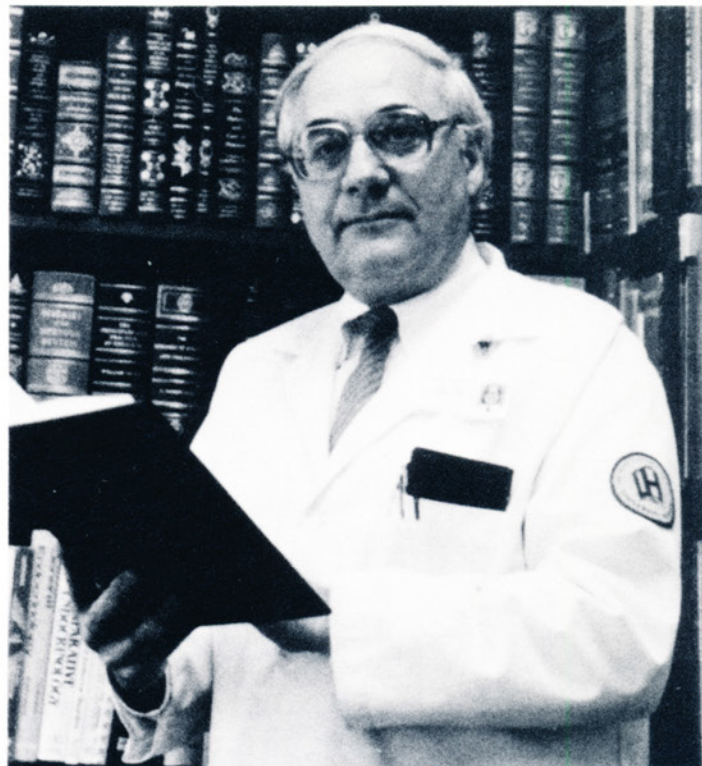

Some of the goals Dr. Cohen has set forth are: a consideration towards improving the medical school curriculum, continued affirmative action and minority recruitment and continued recruitment of excellent students. Currently the school consists of four classes each with 100 students. There are also a number of graduate students in the basic sciences. "We hope to provide the highest caliber medical care for the community," he said.

Cohen is eager to see more communication and idea exchange between the medical school and the rest of the university community. Cohen said, "It could help to strengthen the undergraduate and graduate programs. There could be a stimulation of the entire university intellectual life." Cohen said increased communications could only have a positive effect on both the students and faculty of the university.

Lopressor[®] metoprolol tartrate

Tablets
Ampuls
Prefilled Syringes

DESCRIPTION

Lopressor, metoprolol tartrate, is a selective beta₁-adrenoreceptor blocking agent, available as 50- and 100-mg tablets for oral administration and in 5-ml ampuls or 5-ml prefilled syringes for intravenous administration. Each ampul or prefilled syringe contains a sterile solution of metoprolol tartrate, 5 mg, and sodium chloride USP, 45 mg. Metoprolol tartrate is 1-isopropylamino-3-[p-(2-methoxyethyl) phenoxy]-2-propanol 2:1 dextro-tartrate, and its structural formula is:

Metoprolol tartrate is a white, practically odorless, crystalline powder with a molecular weight of 684.82. It is readily soluble in chloroform, in methylene chloride, and in water; soluble in ethanol; and sparingly soluble in acetone.

CLINICAL PHARMACOLOGY

Lopressor is a beta₁-adrenergic receptor blocking agent. *In vitro* and *in vivo* animal studies have shown that it has a preferential effect on beta₁-adrenoreceptors, chiefly located in cardiac muscle. This preferential effect is not absolute, however, and at higher doses, Lopressor also inhibits beta₂-adrenoreceptors, chiefly located in the bronchial and vascular musculature.

Clinical pharmacology studies have confirmed the beta-blocking activity of metoprolol in man, as shown by (1) reduction in heart rate and cardiac output at rest and upon exercise, (2) reduction of systolic blood pressure upon exercise, (3) inhibition of isoproterenol-induced tachycardia, and (4) reduction of reflex orthostatic tachycardia.

Relative beta₁ selectivity has been confirmed by the following: (1) In normal subjects, Lopressor is unable to reverse the beta₂-mediated vasodilating effects of epinephrine. This contrasts with the effect of nonselective (beta₁ plus beta₂) beta blockers, which completely reverse the vasodilating effects of epinephrine. (2) In asthmatic patients, Lopressor reduces FEV₁ and FVC significantly less than a nonselective beta blocker, propranolol, at equivalent beta₁-receptor blocking doses.

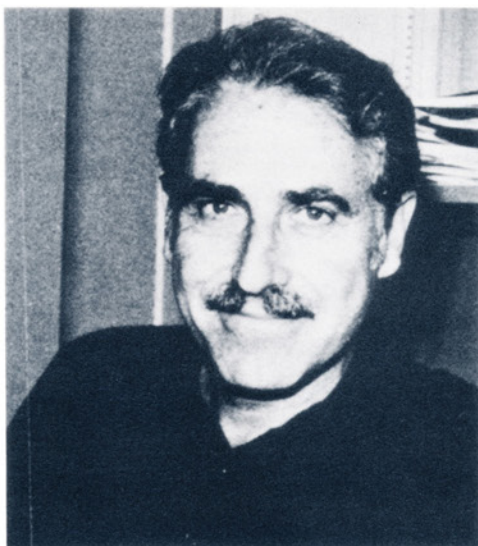

Lopressor has no intrinsic sympathomimetic activity, and membrane-stabilizing activity is detectable only at doses much greater than required for beta blockade. Lopressor crosses the blood-brain barrier and has been reported in the CSF in a concentration 78% of the simultaneous plasma concentration. Animal and human experiments indicate that Lopressor slows the sinus rate and decreases AV nodal conduction.

In controlled clinical studies, Lopressor has been shown to be an effective antihypertensive agent when used alone or as concomitant therapy with thiazide-type diuretics, at dosages of 100-450 mg daily. In controlled, comparative, clinical studies, Lopressor has been shown to be as effective

DISCIPLINE

Discipline,
like the bridle in the hand of a good rider, should exercise its influence without appearing to do so; should be ever active, both as a support and as a restraint, yet seem to lie easily in hand. It must always be ready to check or to pull up, as occasion may require; and only when the horse is a runaway should the action of the curb be perceptible.

FRIENDSHIP

So we grew together,
Like to a double cherry, seeming parted
But yet a union in partition,
Two lovely berries moulded on one stem;
So, with two seeming bodies, but one heart.

Shakespeare

YEARS

Winged time glides on insensibly,
and deceives us;
and there is nothing more fleeting
than years.

Ovid.

Congratulations Mary Budinger, MD and CLASS OF 1989 MD's! Best wishes from John, Libby, Katie, Susan, Meghan, Peter, Michael, and Mom Budinger.	Congratulations to Stuart Lustberg, MD! With love and admiration, Mom, Dad, Kay, Michael, and Joseph.

WAITING

Frail, homebound elderly
no food to nourish
no family to love
no freedom to explore
Just memories and vanishing hopes
confined to loneliness
living for each day
waiting for "meals on wheels"
waiting for human contact
waiting
waiting.....

Innocent, runaway children
no place to turn
no one to trust
no experience to direct
Just shattered dreams and broken hearts
once blossoming flowers
now wilting away
victims to drugs and crime
destined for poverty and illness
waiting for guidance
waiting for love
waiting
waiting.....

Single, homeless mothers
no partner to share
no job to provide
no home to build
Just crying, hungry infants
helplessly dependant
clinging on to battered pride
they fight to stay strong
waiting for a chance
waiting for assistance
waiting
waiting.....

For us to look out and search within.

Dear Dr. Laura J. Reid,
You took the road less traveled, but each must find her own. It was difficult, but you did. My admiration for you goes beyond words. You deserve all the best the world has to offer.

LOVE, YOUR LITTLE
SIS, NANCY

Party Time!

It is our pleasure to invite you to the annual
medical school pot luck dinner party!!!

Please prepare your favorite dish (enough for 4-6 people),
bring family and friends, and be ready for an evening of

Fine Food

&

Exciting Entertainment*

Date: Saturday, April 1st

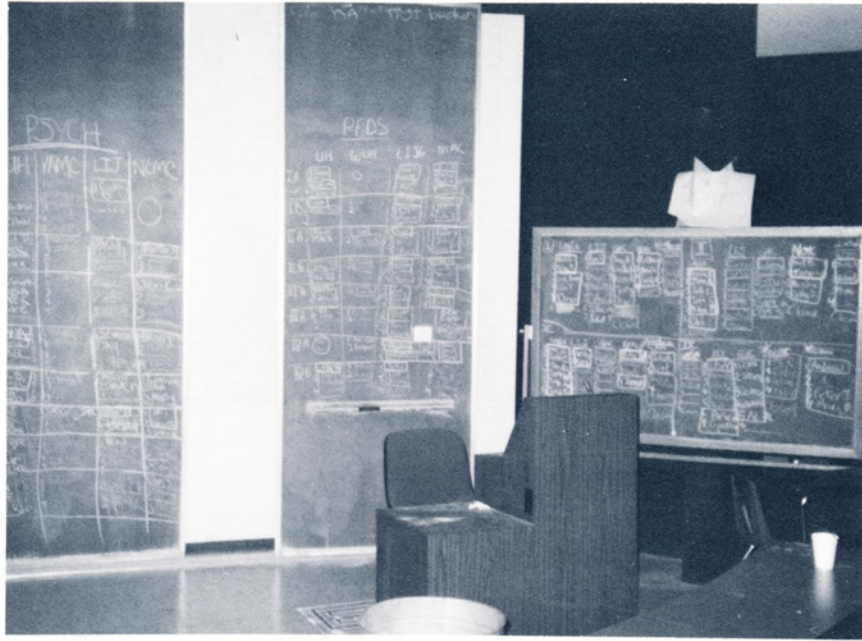

Time: 6:00 p.m.

Place: 3rd Floor Gallery of the HSC

* Faculty participation would be greatly appreciated--if you are planning to do so
please drop a note to Lucille Trabold (2nd year Med) by March 17th!!

SUNWOOD

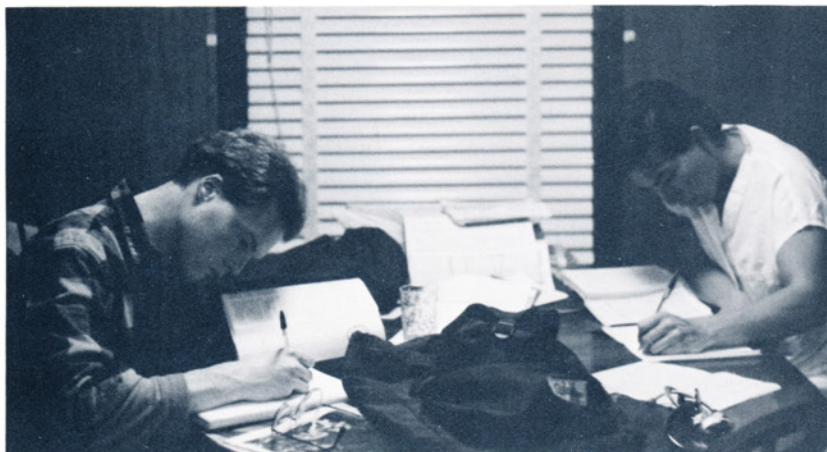

POTLUCK DINNER

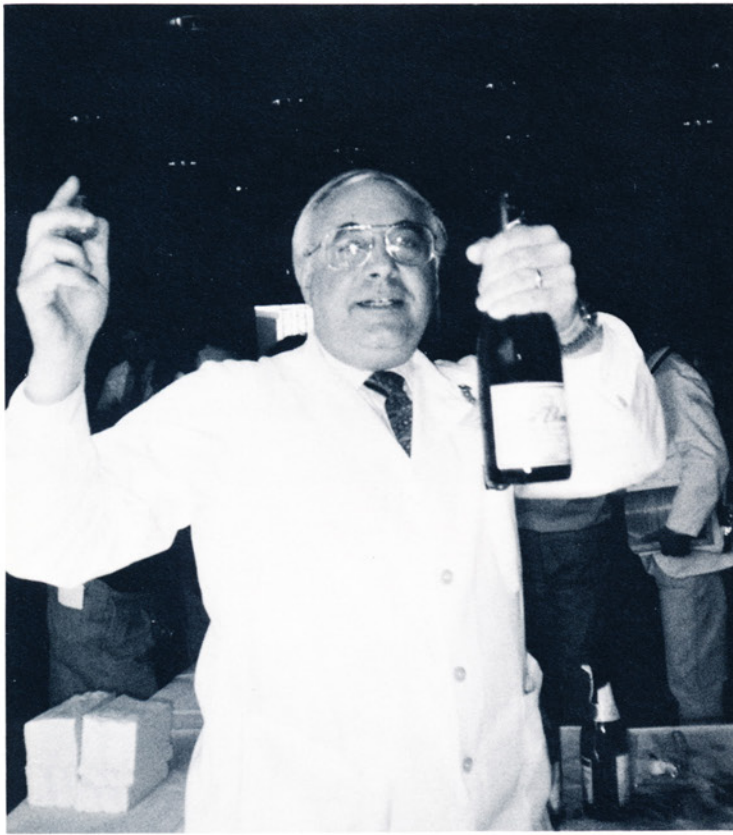

STAR SEARCH

THE MATCH

For Many New Doctors, The Right Prescription

After four years of medical school at the State University at Stony Brook, Arthur Lowy watched his immediate future as a doctor of internal medicine come down yesterday to the contents of a white envelope.

Lowy was among 98 medical students who reached out one by one at noon to meet his or her match — the hospital that would be home for the next three to six years as they serve their residencies. The ceremony on the fourth floor of the Health Sciences Center at the Stony Brook School of Medicine was paralleled by similar turning points throughout the nation as students opened the envelopes, which contain computerized matchups coordinated by the National Residency Matching Program in Evanston, Ill.

"It was a rather tense moment," Lowy, 25, of Forest Hills, said after exchanging champagne toasts with his fellow interns. He will spend the next three years in Jacobi Hospital, now part of the Bronx Municipal Hospital Center. "I felt a little weak in the knees," he said.

The same kind of tension Lowy felt was experienced by 25-year-old Lisa Lih of Massapequa, who got a close-by match with North Shore University Hospital in Manhasset. "I was extremely nervous before I opened it," said Lih, who wants to study hematology and oncology. "It's the next three years of your life that you are deciding right at that moment," Lih said. "You never know if where you want to go wants to choose you."

At Stony Brook, 58 percent of the medical students were matched with their first choices, 80 percent with one of their top three choices, and only 3 percent matched beyond the ninth choice, according to Dr. Lawrence Sherman, a dean for academic affairs at the school of medicine.

The matchups sent Stony Brook medical students to hospitals as far away as Seattle, Wash., and San Diego, Calif. At the same time, ceremonies elsewhere in the country were directing others to

residencies in Nassau and Suffolk.

"It was a glorious day," said Sherman. "We are covering the major teaching hospitals on Long Island."

Three of Long Island's major teaching hospitals filled their total openings — Stony Brook with 83, North Shore University Hospital with 75 and Winthrop-University Hospital with 39. Nassau County Medical Center filled 53 of its 62 slots.

Nassau Medical Center spokesman Ed Smith said that specialty areas such as pediatrics, surgery and obstetrics were filled by first choice candidates.

The transition from classroom medical student to a practicing doctor will have particular significance this year for the new doctors, who will be among the first to benefit from new state regulations limiting the number of work hours.

As of July 1, residents will be permitted to work no more than 80 hours a week. In previous years, residents worked as many as 100 hours a week.

"The whole challenge in the regulations began with the understanding that residents' working hours were so extensive that the residents were exhausted while at work, and that it was not good patient care," said Dr. Janet Freedman, immediate past president of the Committee of Interns and Residents, a doctors' union covering New York, New Jersey and Washington, D.C.

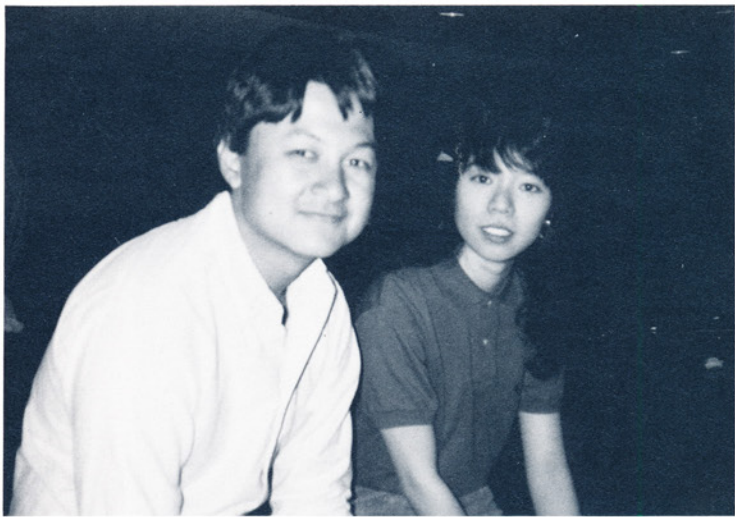

The new regulations also require teaching hospitals to have adequate ancillary staff to relieve the residents of such duties as drawing blood, starting and maintaining intravenous services, and transporting messages, Freedman said.

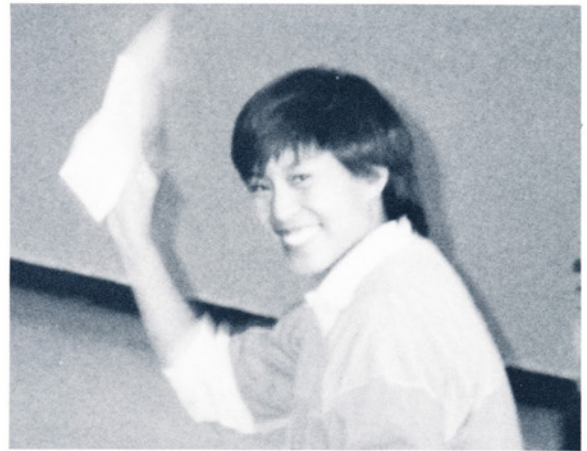

"I think it's a good move that working hours be somewhat more reasonable," said Cathie Durie, 28, of Kansas City, who will be doing her residency in psychiatry at Strong Memorial Hospital in Rochester. "I don't think it should be to the detriment of patient care, but having a little bit of sleep when you're on call makes a big difference."

GRADUATION

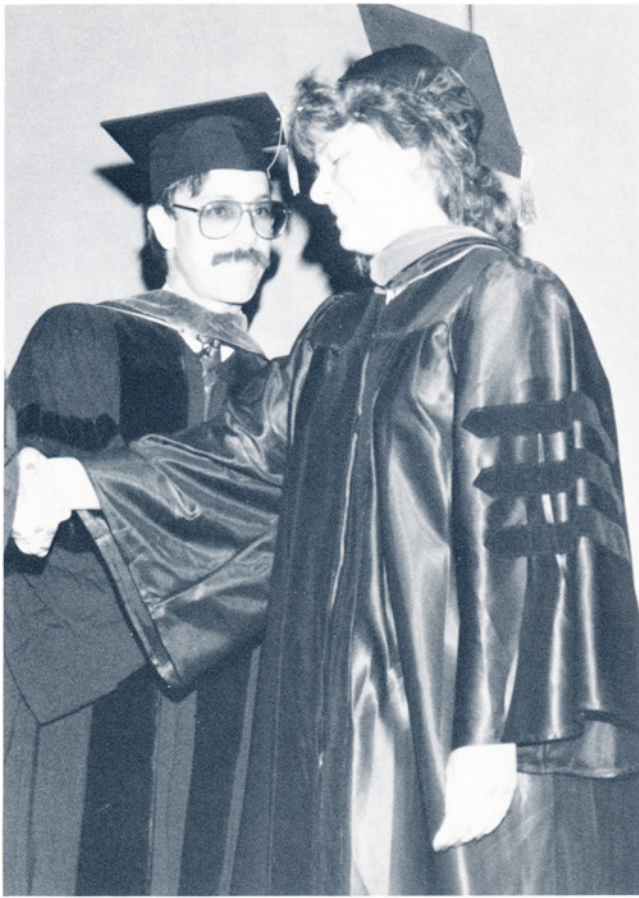

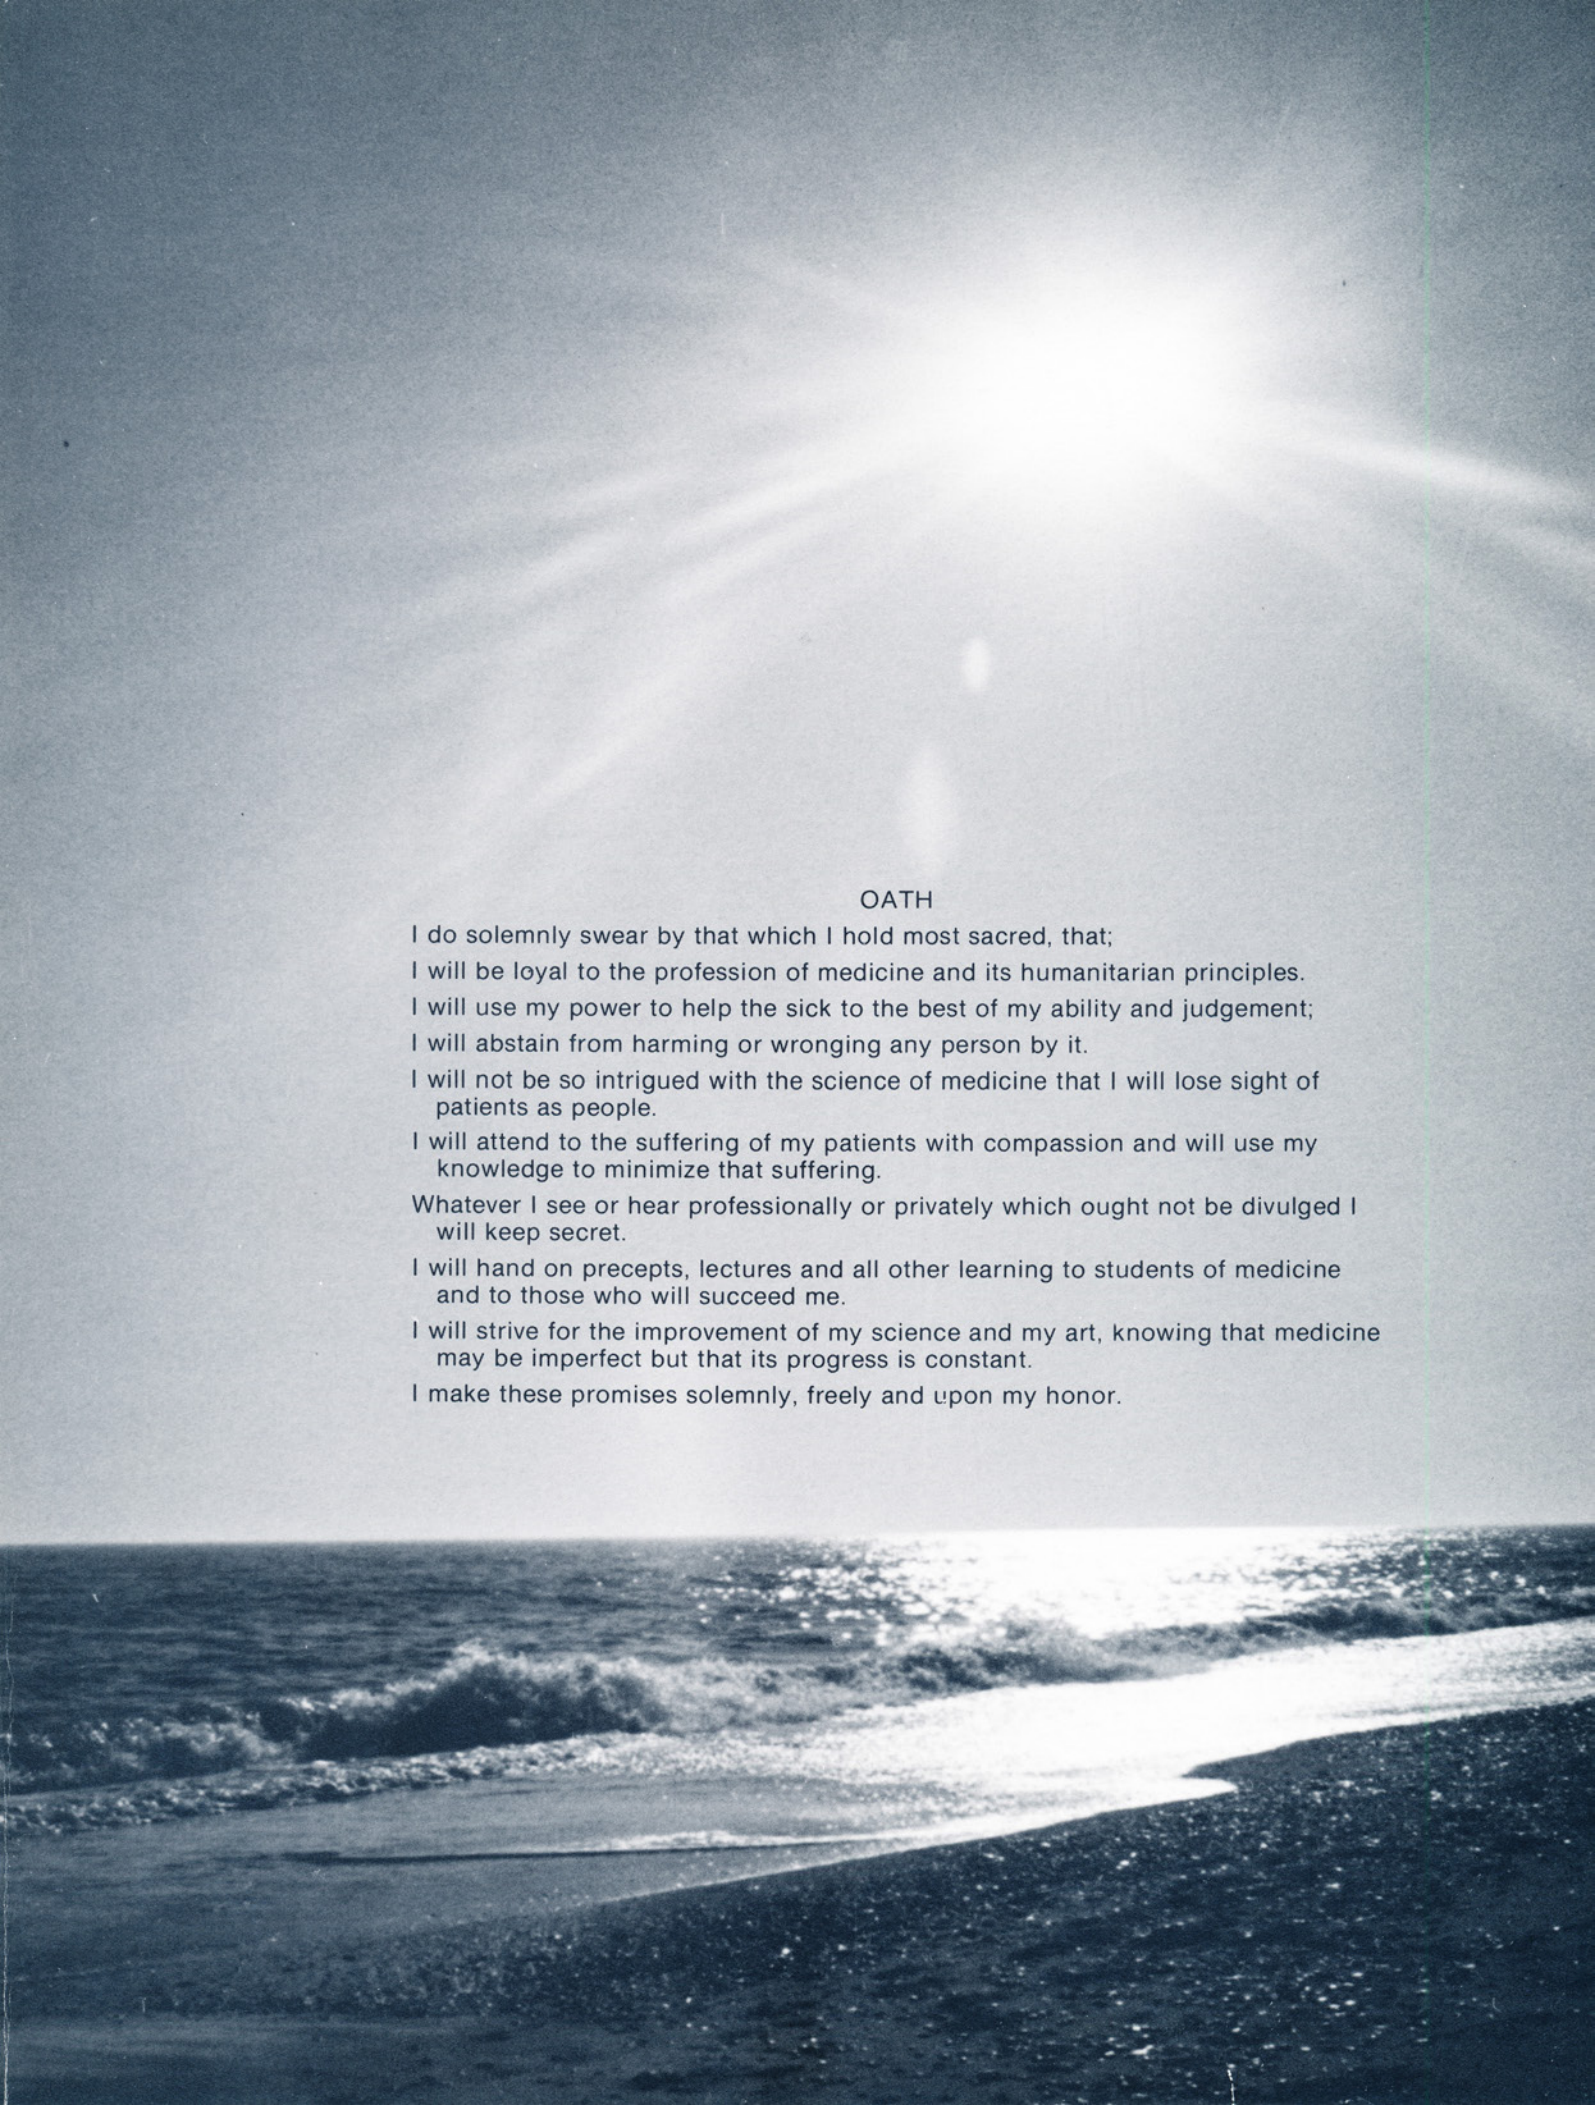

OATH

I do solemnly swear by that which I hold most sacred, that;
I will be loyal to the profession of medicine and its humanitarian principles.
I will use my power to help the sick to the best of my ability and judgement;
I will abstain from harming or wronging any person by it.
I will not be so intrigued with the science of medicine that I will lose sight of patients as people.
I will attend to the suffering of my patients with compassion and will use my knowledge to minimize that suffering.
Whatever I see or hear professionally or privately which ought not be divulged I will keep secret.
I will hand on precepts, lectures and all other learning to students of medicine and to those who will succeed me.
I will strive for the improvement of my science and my art, knowing that medicine may be imperfect but that its progress is constant.
I make these promises solemnly, freely and upon my honor.

*Do not stand there, do not weep,
The resident physician does not sleep.
Their brightness glows in the soft starlight,
They are a beacon in the night.
The resident is trained, experienced and skilled,
Their attempts to help you will be fulfilled.
They will be as gentle as the autumn rain,
They will help with problems and alleviate pain.
Their white uniforms are wrinkled and dirty,
Their twelve hour shift feels like thirty.
A feverish child is treated with a gentle hush,
The injured repaired with a soothing touch.
The pregnant are calmed and reassured,
The demanding ones have to be endured.
The cancer patient receives sincere empathy.
The suicidal patient awaits psychiatry.
The tired staff responds to the code.
Their fatigue wanes as they follow the mode.
It is successfully performed.
Now, the family must be informed.
Even in the early morning cool air,
The patients are coming there.
Whomever the blinking ambulance brings,
A million patients with all sorts of things.
The real MASH unit lives there.
This is the actual St. Elsewhere.
Do not stand there, do not weep.
The residents are here.
They do not sleep . . .*
